Server & Datacenter

Paid

This addon give the possibility to add a color to issue status at Glance

➤ Description

With this Jira 9 Server/Datacenter add-on, your Jira users will live in a full-color world! ... more beautiful than the usual and bored "blue", "yellow", "green" in the statuses of the issues. The colorization is done in the Issue Search View screen, in the Issue Screen, in the Jira Dashboard gadgets, Jira Service Management queues and Customer Portal. With this plugin your Jira will look like a pretty amazing software!. The list of colors that this plugin allows are the entire HTML common color name values. **Take a Look inside the entire list of color names**

Now compatible with the plugin "[Kanban Gantt \(jgantt\) for Jira](#)"

Now compatible with the plugin "[ALM Structure for Jira](#)" *Since version 4.2.21*

Now compatible with "[Atlassian Advanced Roadmaps/Plans](#)" *Since version 4.4.0*

Since version 4.2.20 [New Status Colors \(FREE\)](#) plugin features are included in PRO version

Summary video (2 minutes):

➤ Install add-on

Follow the classic way to install using the *Find new apps*, as shown below

The screenshot displays the Jira Add-on Marketplace interface. On the left is a sidebar with navigation links: Dynamic Forms, Multilevel Structure, User Synchronization, Get Help, ACTIONS FOR JIRA SERVICE DESK, Workflow Actions, Get Help, JIRA MISC CUSTOM FIELDS, Getting started with JMCF, JIRA MISC WORKFLOW EXTENSIONS, Getting started with JMWE, JMWE Configuration, Groovy Console, Shared Groovy Scripts, LASTLOG-ADD-ON, View log, Thread Dump, SUMUP, Calculation rules, User Permissions, Administrator configuration, and THE SCHEDULER. The main area lists five add-ons, all by 'www.MrAddOn.com' (Top Vendor):

- PROJECT MANAGEMENT**: 253 installations, Paid via Atlassian, Buy now button.
- Support Admin Tools for Jira**: 4-star rating (4 reviews), 294 installations, Paid via Atlassian, Buy now and Manage buttons.
- New Status Colors PRO for Jira**: 3-star rating (3 reviews), 186 installations, Paid via Atlassian, Free trial and Buy now buttons.
- Issue Card Printer for Jira**: 5-star rating (5 reviews), 63 installations, Paid via Atlassian, Buy now and Manage buttons.
- Kanban Gantt for Jira (jGantt)**: 8-star rating (8 reviews), 422 installations, Free, Manage button.

Each add-on entry includes a brief description of its functionality.

➤ General Configuration

We can set new color for own states easily. Just put the right color code (we can discover the right color code from this page, where there is a great explanation of all colors) inside the **Description** field as show on following images: **(put the colorname in lowercase and between parenthesis in the description)**

example: (red), (orange) (springgreen), (black),...

The screenshot shows the 'Edit status' dialog box. It has three main fields: 'Name' with the value 'Pending', 'Description' with the value '(black)', and 'Category' with a dropdown menu showing 'In Progress'. Below the 'Description' field, there is a text explanation: 'Explains the significance of an issue when it is moved in to this status. Descriptions of a status will appear in tooltips.' Below the 'Category' field, there is another text explanation: 'Helps identify where an issue is in its lifecycle. Issues move from **To Do** to **In Progress** when work starts on them, and later move to **Done** when all work is complete.' At the bottom right, there are two buttons: 'Update' and 'Cancel'.

How to colorize the Jira System Statuses like "Backlog", "In Progress", etc using the Translate option

Since Jira 8, Atlassian overrides the status description and replaces the color for the standard one in the system statuses. This is a problem? NO 😊 We are lucky and there is a trick to change the color in Jira 8 also for those situations. It and it's easy!

Just use the **Translate** status button

⚠ You have temporary access to administrative functions. Drop access if you no longer require it. For more information, refer to the documentation.

Addon is compatible with Kanban Gantt and the task bars will be shown by status-colors.

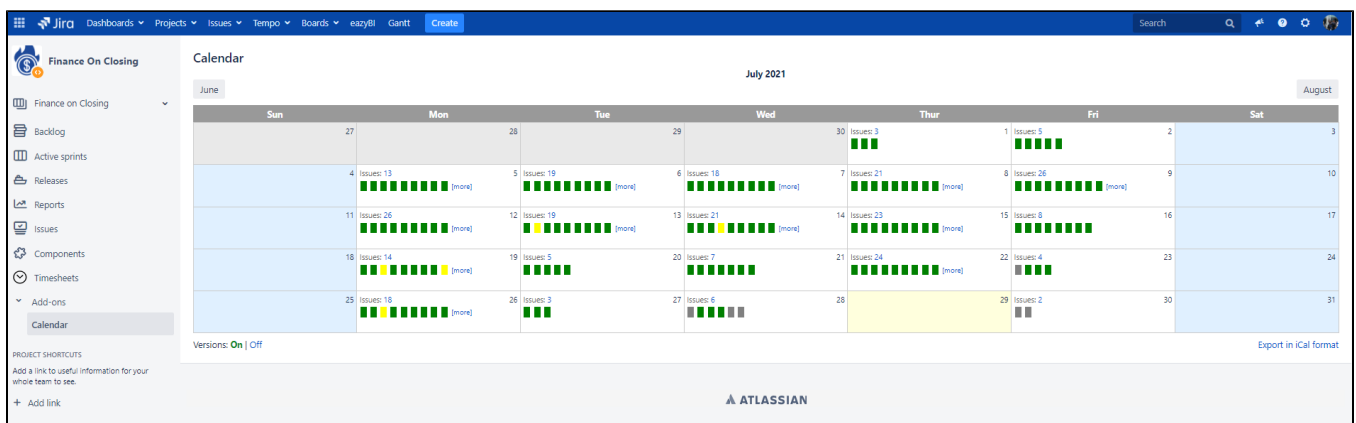

Calendar view inside addon

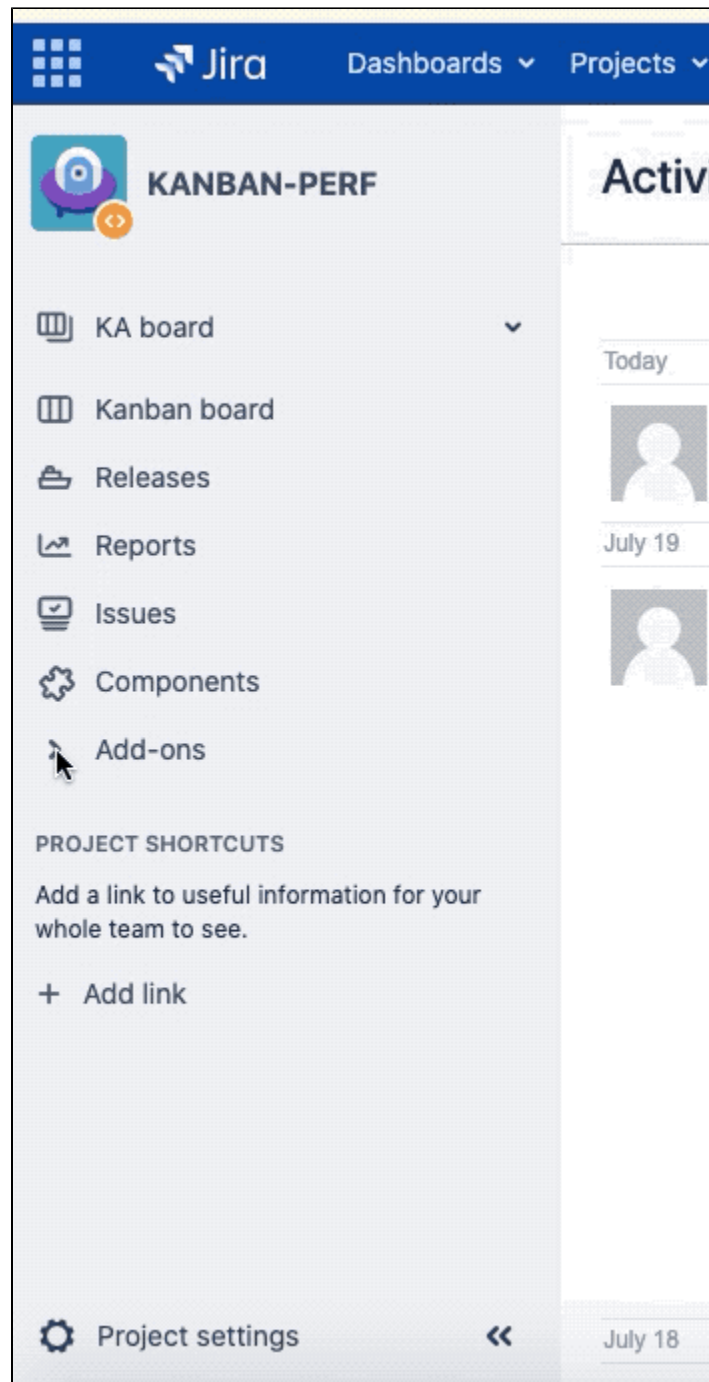

Since version 4.1.1 a **Calendar View inside Projects** and a **Calendar Dashboard Gadget** is available, where we can get an overview of the situation at any time.

In order to be able to activate this view, the tasks in the project must have the **DueDate** value set. In this case we have the possibility to display a calendar with this information with colors based on the status color.

As shown in the following GIF, we can display the calendar by selecting, from the left-hand sidebar, the Add-ons item and from there the new Calendar item.

The **calendar view** can be switched *on or off*. Simply activate or deactivate it, as shown in the following GIF:
(disable the module "Issue Calendar Panel" inside the Status Colors add-on/license screen)

TSP-1 has been updated.

Migration path from Jira Server to Jira Cloud

If you use the migration tool of Atlassian, the migration of **New Status Colors PRO** from **Jira Server** to **Jira Cloud** is automatic. But the Jira admin must review and update the statuses descriptions in order to remove the "(Migrated...)" part.

Issues	
Statuses

Find on a board

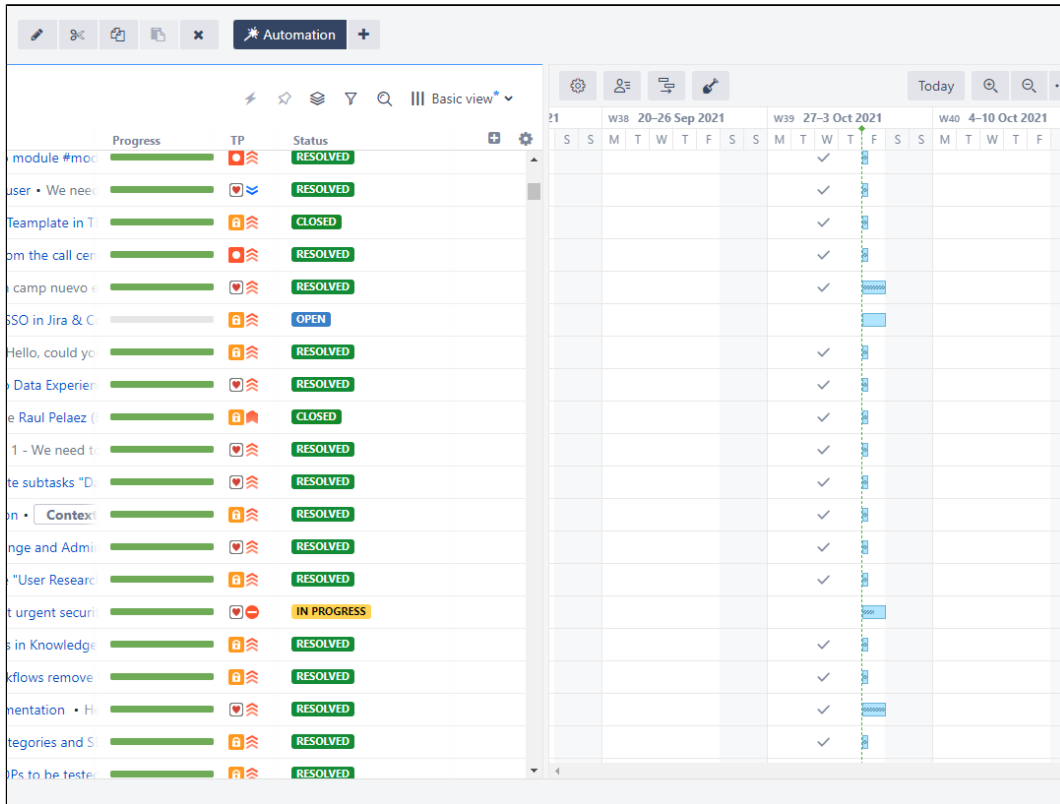

Auditing a ticket will now be a simple task

Troubleshooting: (by Jira Users & Admins)

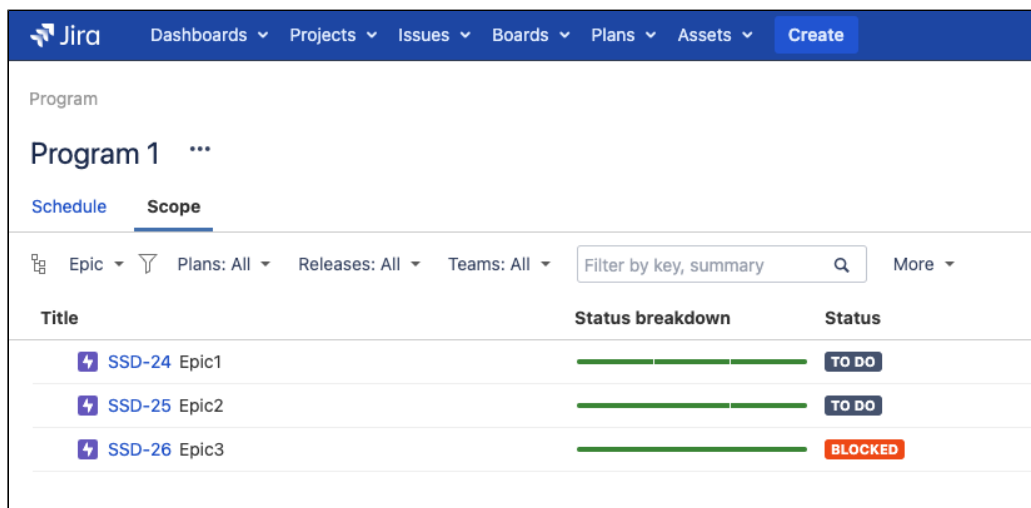

Release Notes

- 18-03-2024 New compatibility with App Kanban Combined WIP
 - Linked Issues are now colorized in Kanban board card links
- 06-03-2024 Compatible with the new JSM queues and compatible with Jira 9.14 new libraries
- 29-01-2024 Little fix in the borders of the statuses button in the issues
- 14-08-2023 New Features:
 - New Audit Transitions and Time in status IssueView Panels.
 - Removed the button from the user preferences section, now the colors cache refresh automatically.
- 22-06-2022 New version compatible with new Issue View of Jira 9

- 01-07-2022 New version compatible with Jira 9 Service Management Queues and Customer Portal
- 04-07-2022 All the features of New Status Colors (free) plugin are now included in New Status Colors PRO (autocolorization of **WAITING/PENDING/ON HOLD** statuses in “orange” and **CANCEL/CANCELLED/DENY/DENIED/REJECTED** statuses in “red”) since version New Status Colors PRO version 4.2.20 (for Jira 9). Since now, NewStatusColors FREE plugin can be uninstalled.
- 05-07-2022 Now compatible with ALM Structure plugin views
- 16-12-2022 New features:
 - - Workflow statuses are now in full-color spectrum
 - - Board columns statuses are now in full-color spectrum
 - - Improved cache of colors, now in localstorage instead of cookies
 - - Improved compatibility with Structure App

- 28-02-2023 New features:
 - Now compatible with "Atlassian Advanced Roadmaps/Plans" Since version 4.4.0
