Standalone Project Template for Jira

by [MrAddon@](#) by [TecnoFor](#)

Server

Paid

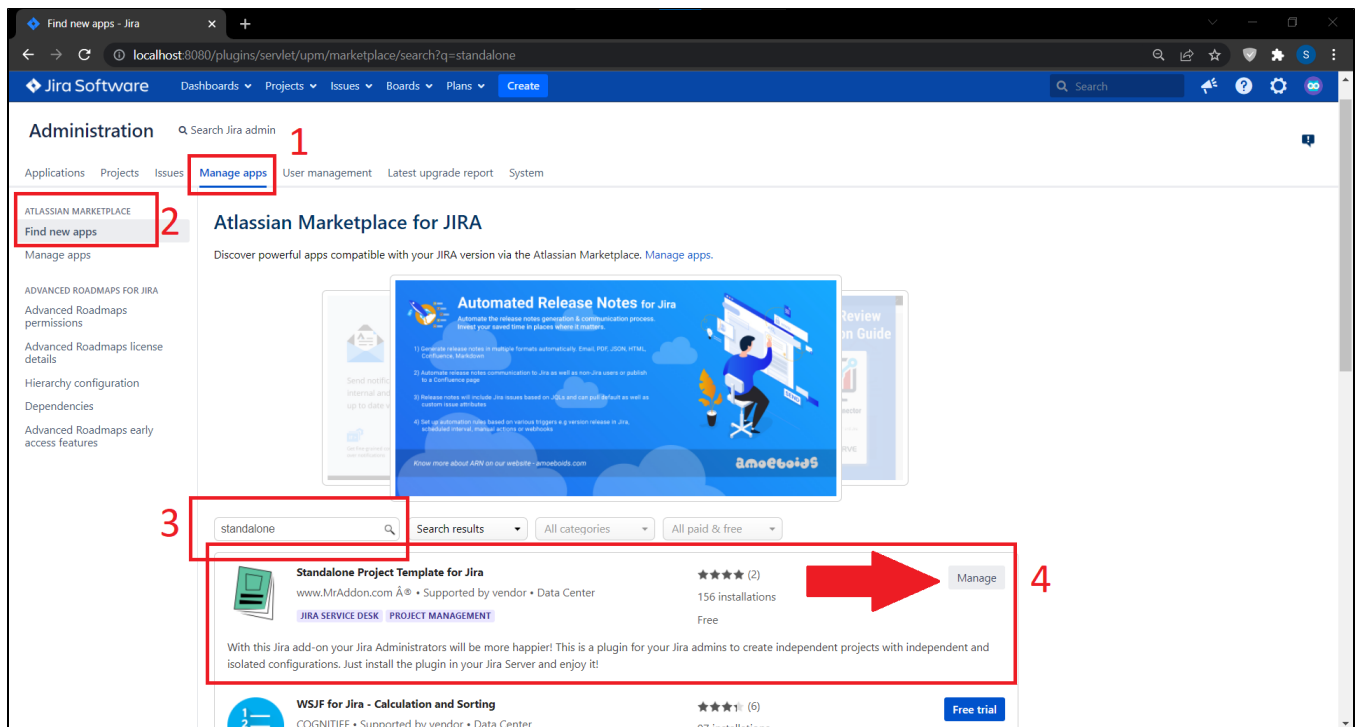

Create new projects with independent configuration from scratch.

➤ Description

Create new projects with independent configuration from scratch and using a copy of a Permissions Scheme Template called '**Standalone Project Template**' (You must create the Permission Scheme with this name first).

➤ Install addon

After download the JAR, install using the link in **Manage apps** page, search addon as show in following the image:

➤ General Configuration

Addon doesn't introduce a specific **General Configuration page**. However, only one configuration is needed. We can define a specific **Permission Scheme** for own new project. Just define one named **Standalone Project Template**.

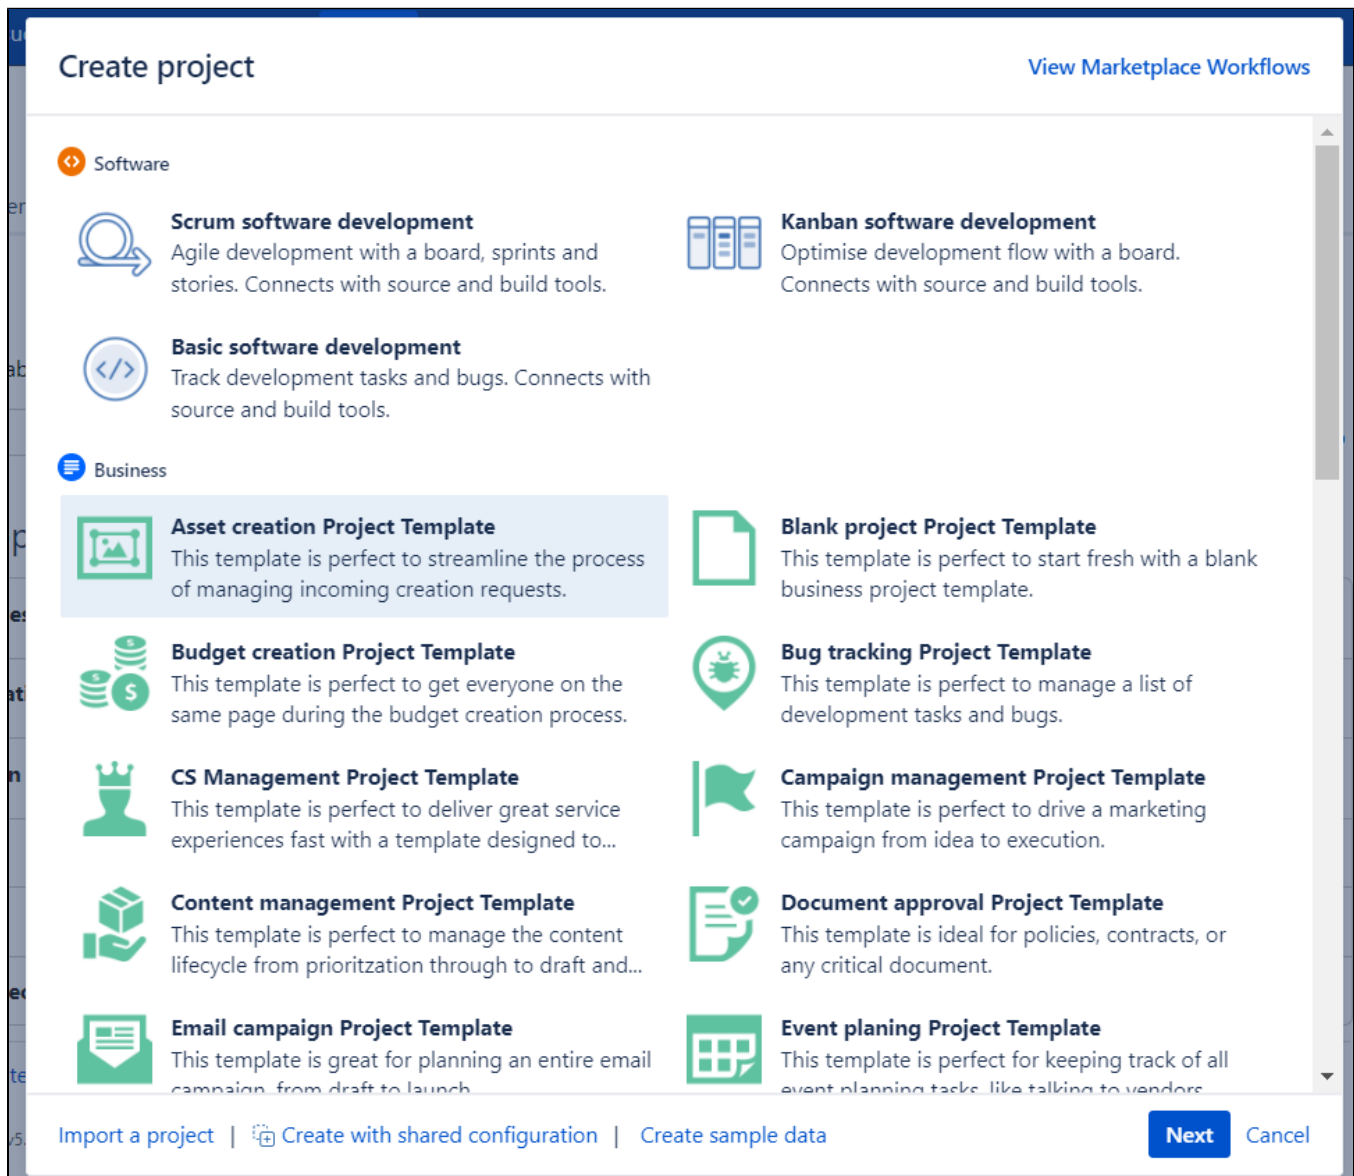

| | | | |
|----------------------|--|----------------|------------------------------|
| Notification schemes | | | |
| Permission schemes | | | |
| | Jira Service Desk Permission Scheme for Project COVID This Jira Service Desk Permission Scheme was generated for Project COVID | • testdbasico | Permissions Copy Edit Delete |
| | Jira Service Desk Permission Scheme for Project SD This Jira Service Desk Permission Scheme was generated for Project SD | • SERVICE DESK | Permissions Copy Edit Delete |
| | Jira Service Desk Permission Scheme for Project TESSDSS This Jira Service Desk Permission Scheme was generated for Project TESSDSS | • testsd | Permissions Copy Edit Delete |
| | Standalone Project Template Standalone Project Template | | Permissions Copy Edit Delete |

Atlassian Jira Project Management Software (v8.3.2#803003-sha1:c034048) · About Jira · Report a problem
Powered by a free Atlassian Jira evaluation license. Please consider purchasing it today.

ATLASSIAN

➤ Usage

To activate the new project, just start create a new project and select the new **Project template** added, as shown in following figure:

Create a new project is very easy, only con can follow this GIF:

ctions. [Drop access](#) if you no longer require it. For more information, refer to the [documentation](#).

If a Permission scheme is defined, this is the final result:

After the creation, we can easily customize any project configuration. 😊

➤ Result

We can define own standalone project using own template.
