QR Issue Card Printer for Jira

by MrAddon® by TecnoFor

Server & Datacenter

Paid

This addon give the possibility to print the issues as cards with beautiful layouts

Description

Print your **filters and issues** with a single click, with a configurable and beautiful layout.

Show a large **QR code** in each card to quickly locate your tickets.
Now you can also print from your **Kanban or Scrum board and from your backlog view**!
New features coming soon!

The code is based in the awesome Github repository of Bengt Brodersen from Qoomon.

Summary video (2 minutes):

Install addon

Follow the classic way to install using the ***Find new apps***, as shown below

As you see, procedure is very easy 🙂

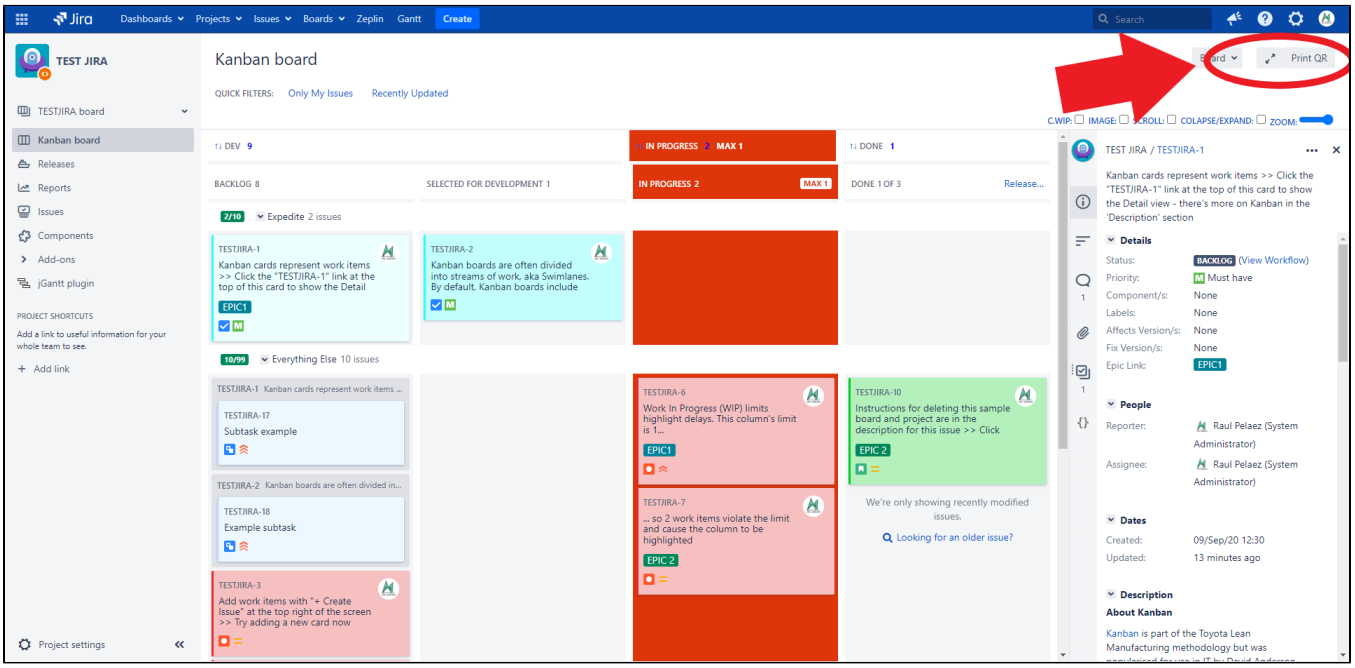

That's all! Now take a look in your ***Issues, Filters and Kanban/SCRUM boards and backlogs*** and you will see a new button "**Print QR**"

General Configuration

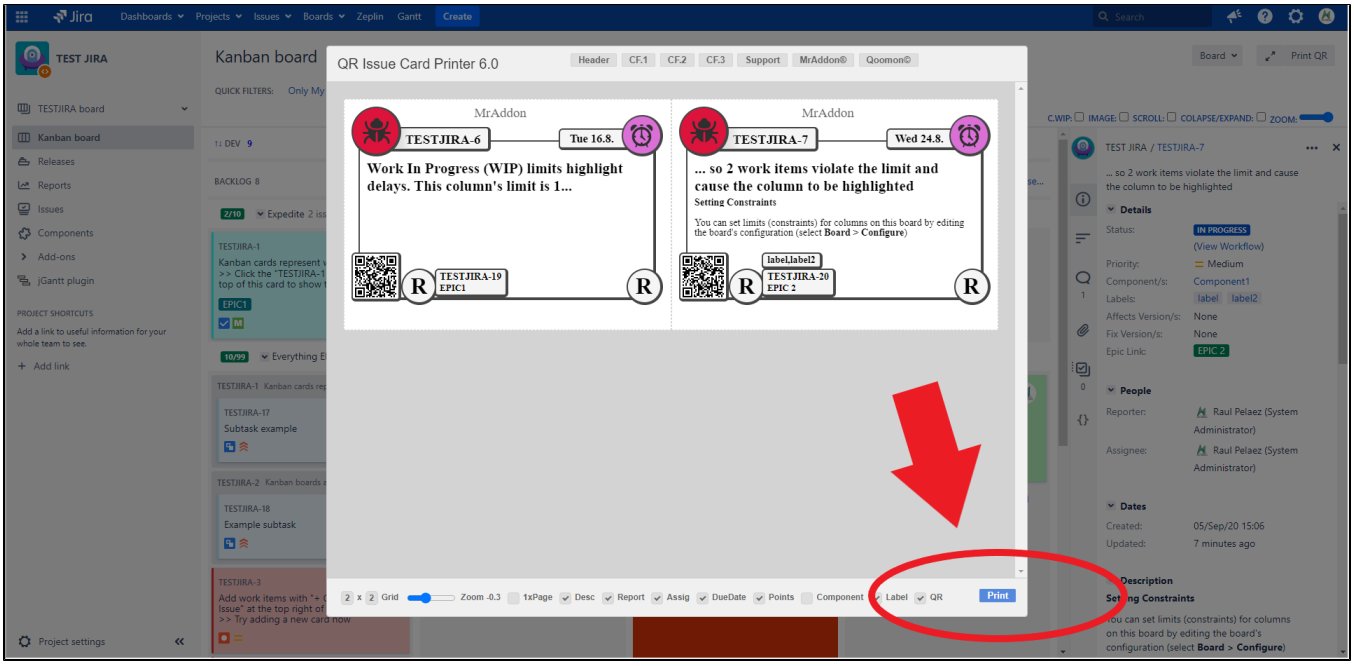

No General Configuration is needed. Just use it 😃

Usage

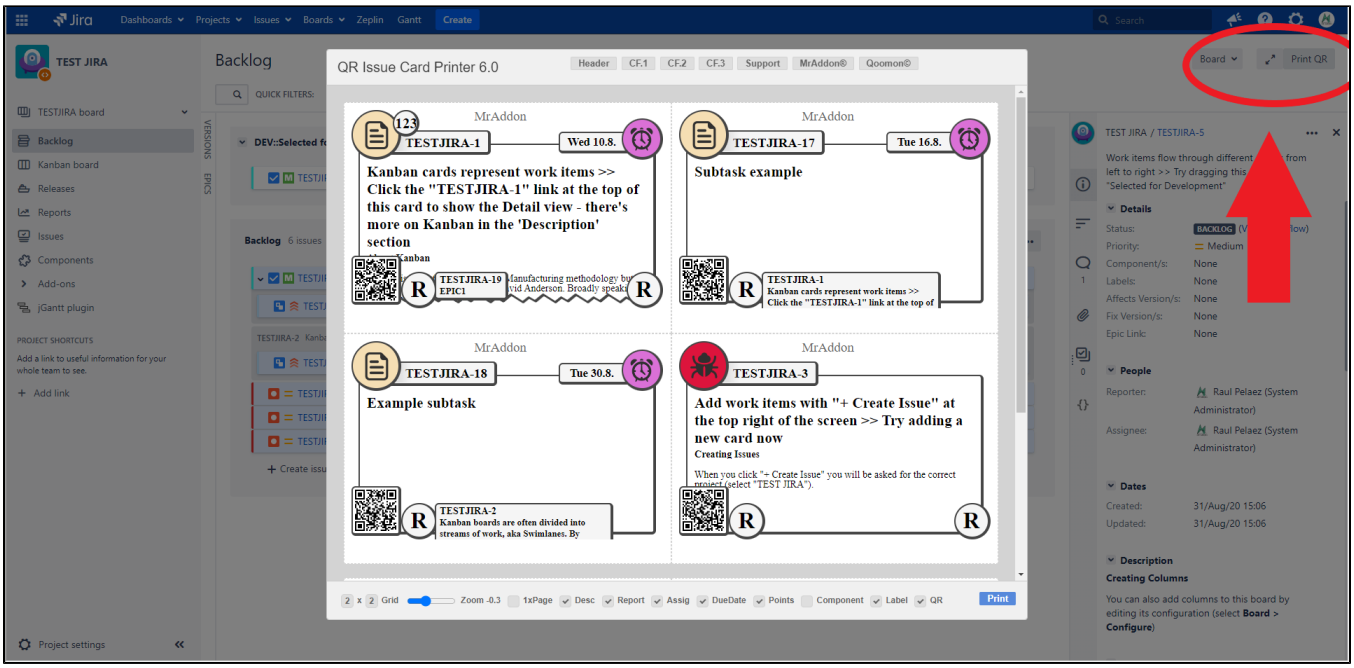

Addon put a new button “**Print QR**” in ***Search for issues, filters , Kanban/Scrum boards, backlogs and Issue views.***

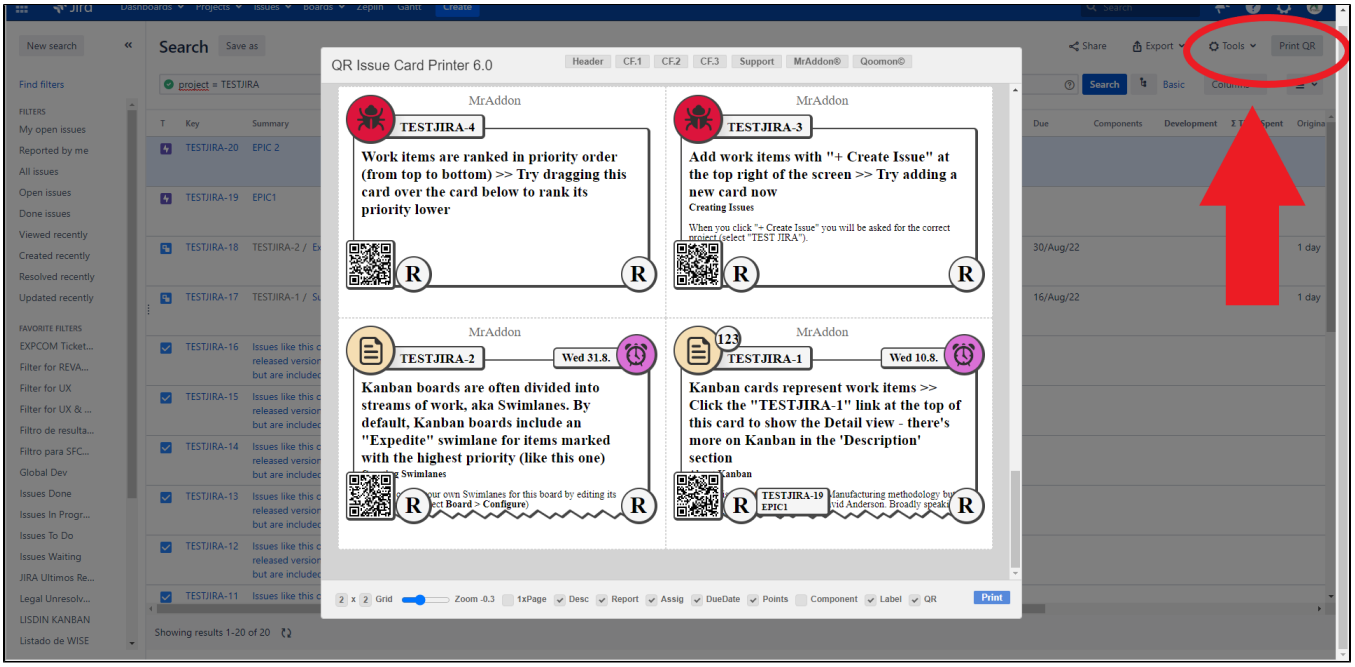

So just **select issues** with “**Ctrl**” or “**Shift**” key and click in **Print QR** button from a **Kanban/Scrum boards**.

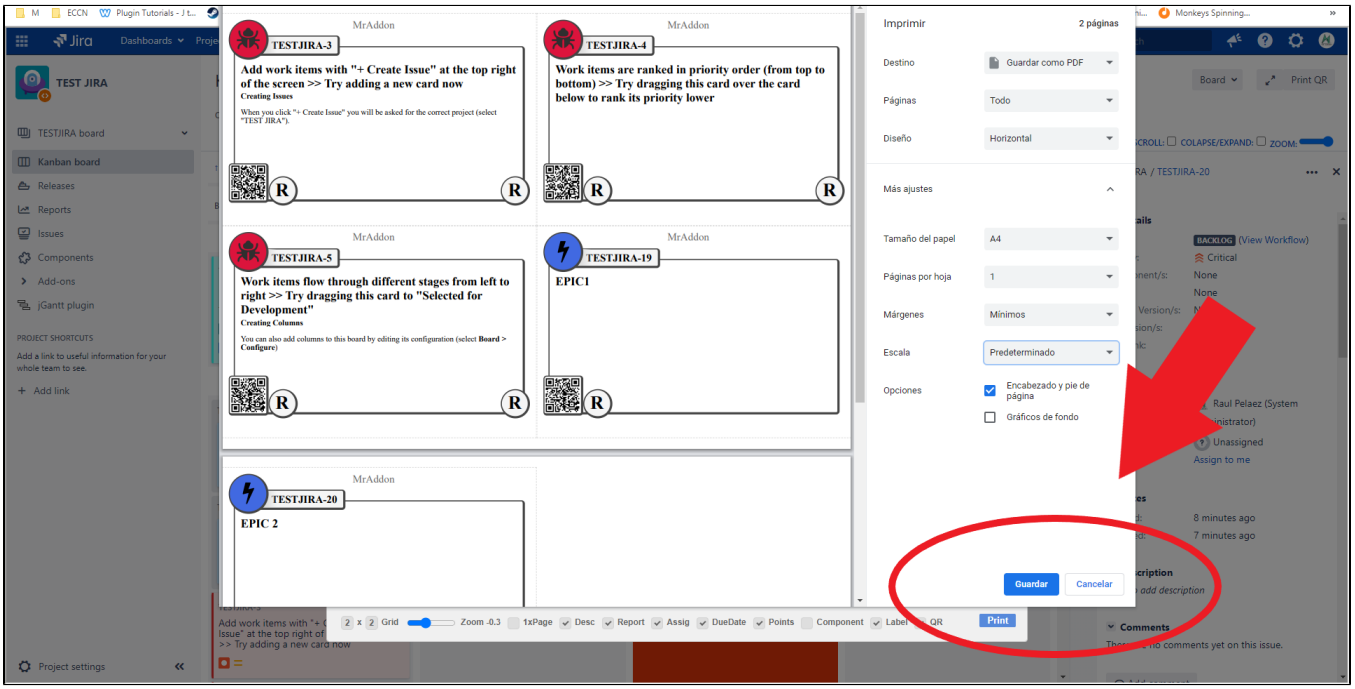

Or just **select issues** with "**Ctrl**" or "**Shift**" key and click in **Print QR** button from a **Backlog view of the board**.

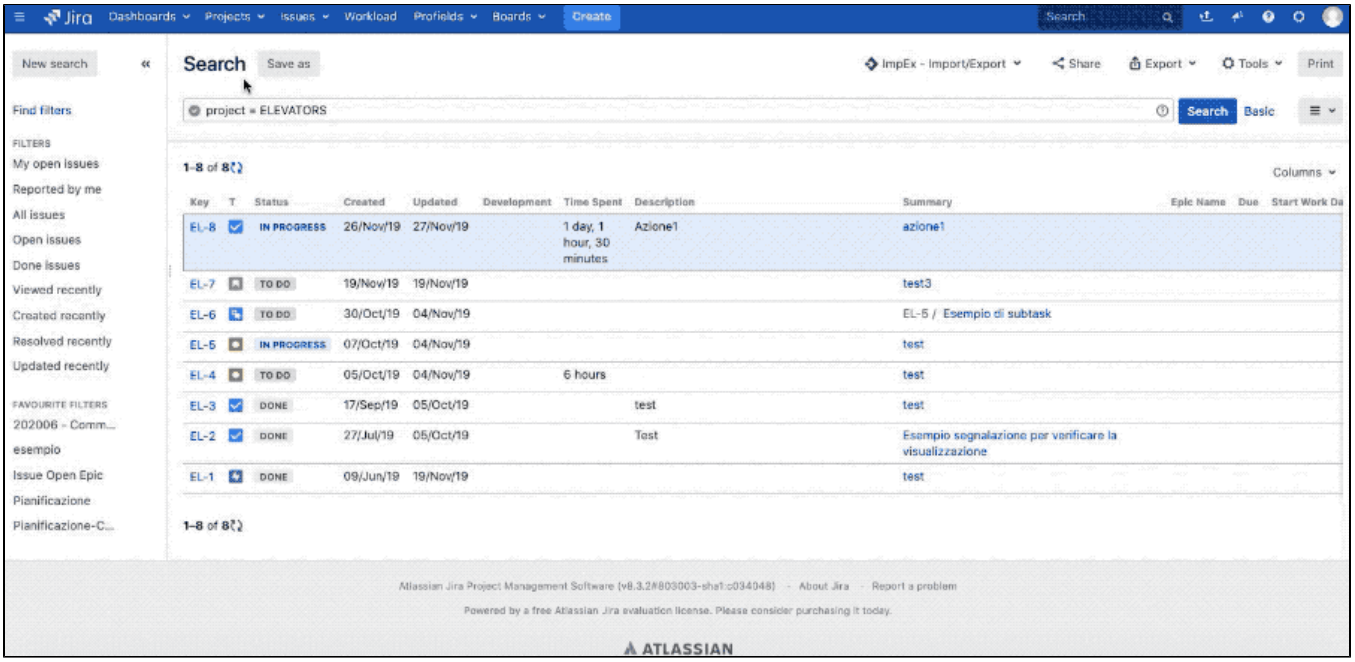

Or just **Search for Issues** or select a **saved Filter** and click in **Print QR** button!

Once finished click in "**Print**" to configure **margins** and send the cards to the printer!

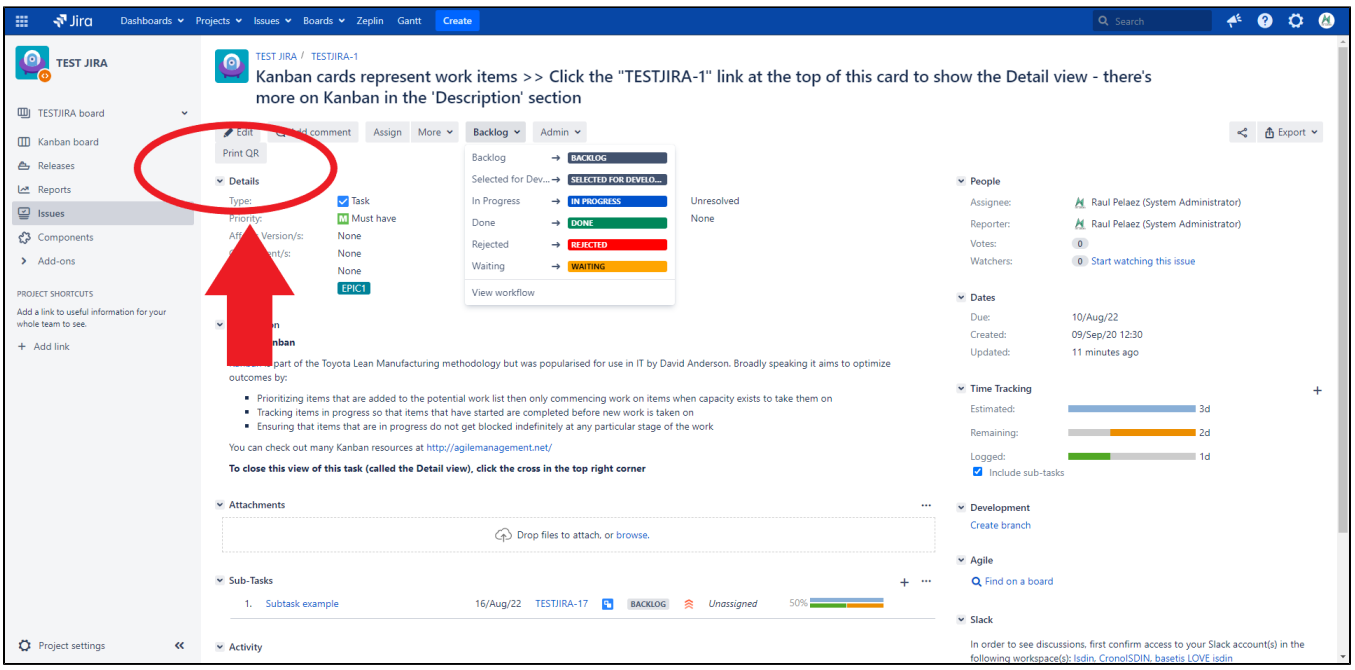

Example:

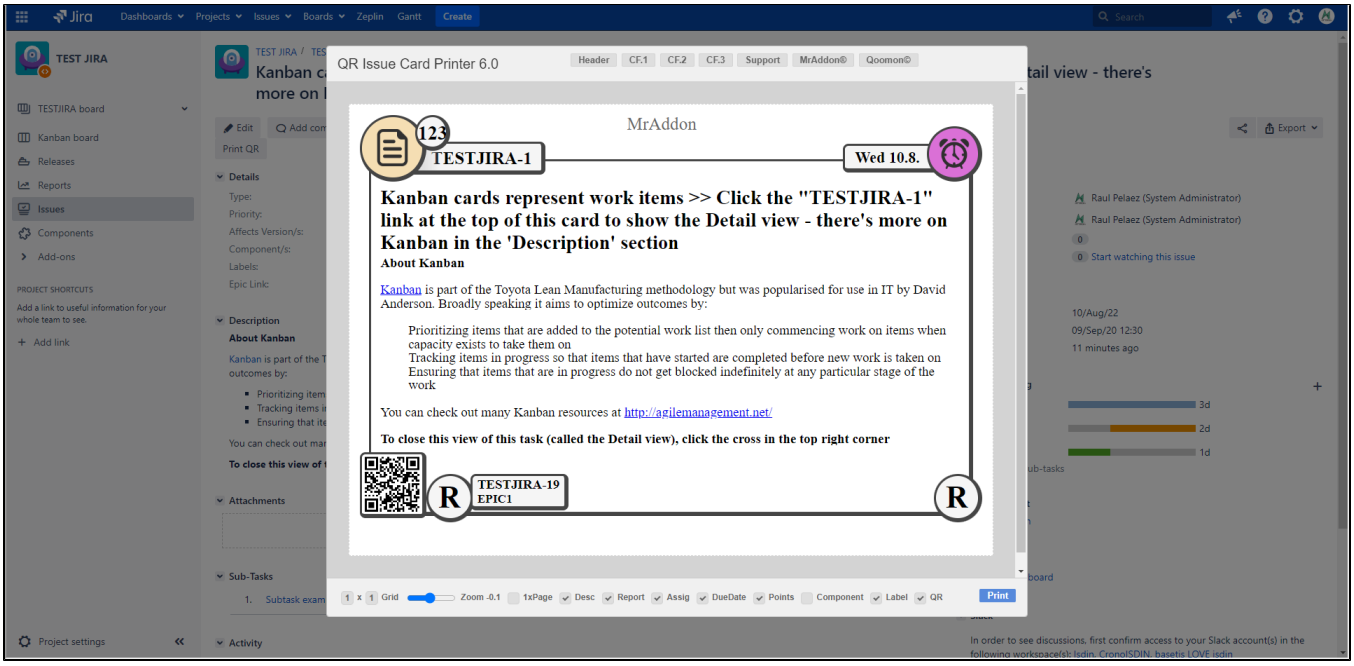

Print only one Issue!

Yes, in the Jira usual Issue View you will see the extra button "**Print QR**", just click it!

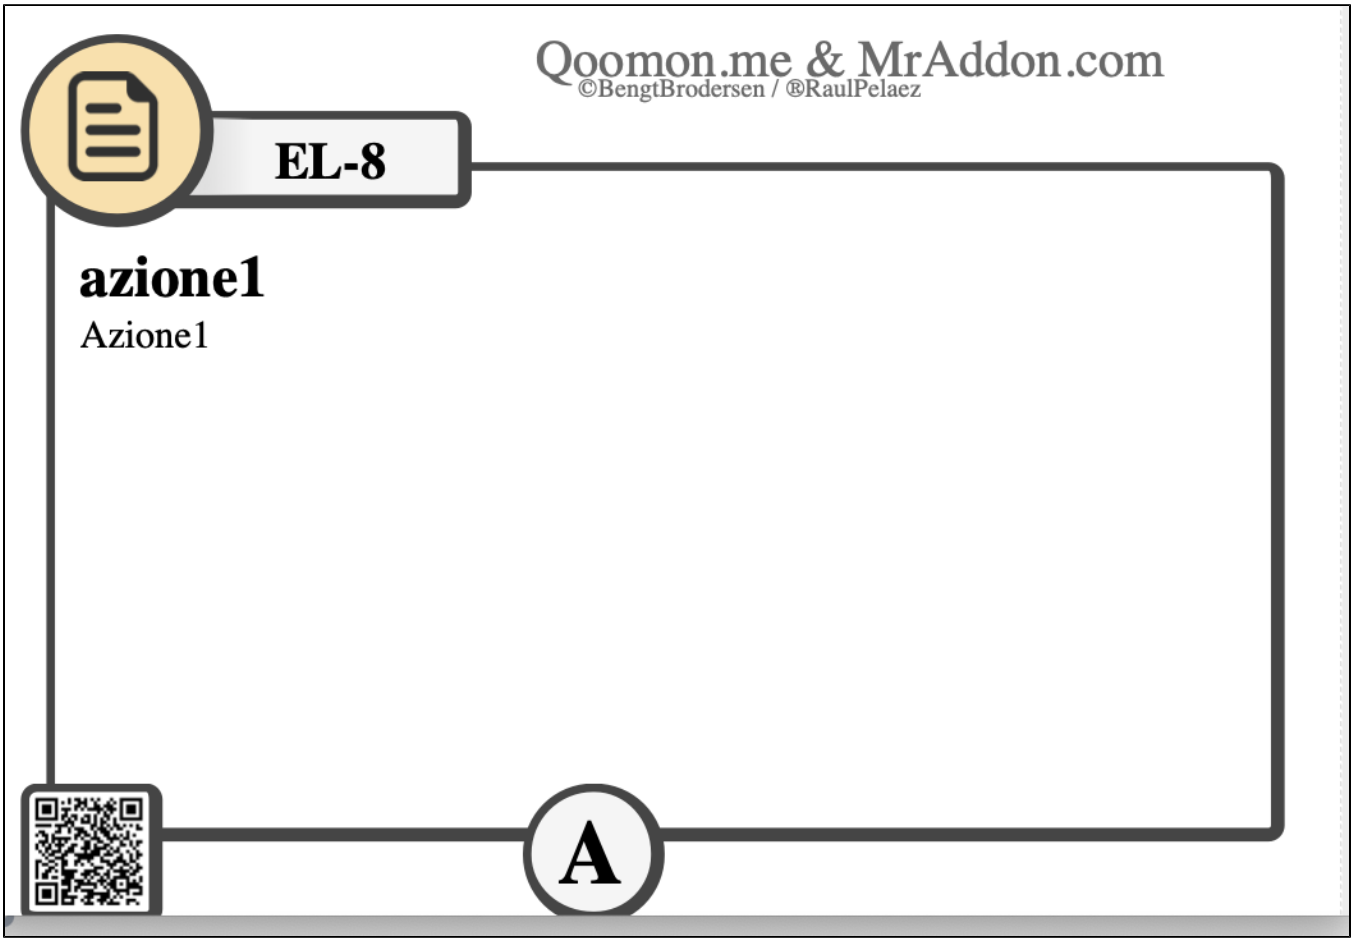

Ready to print!

Result

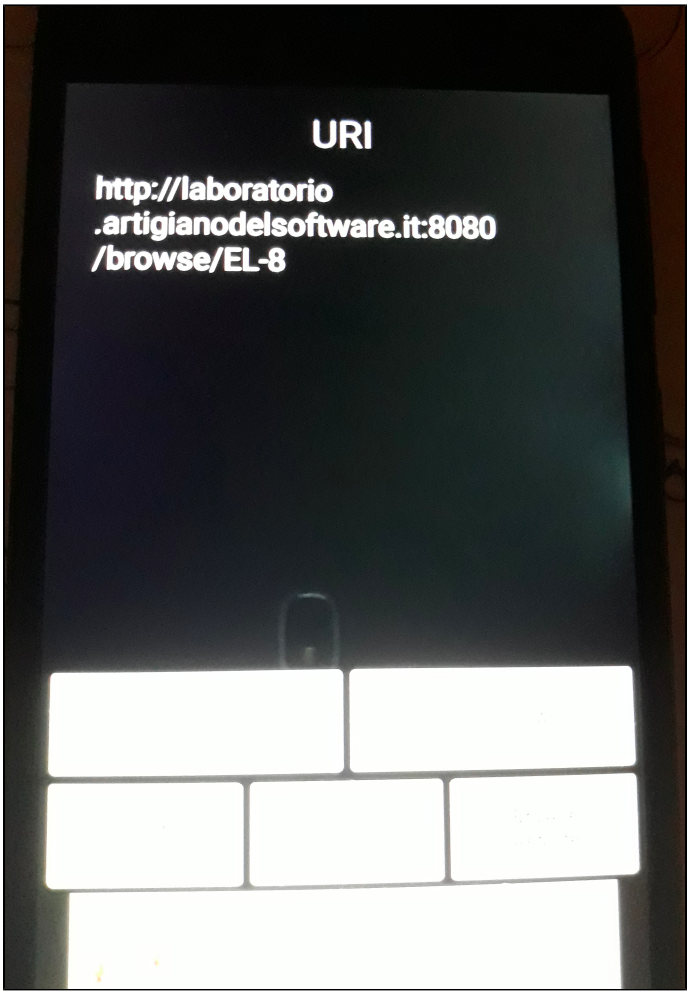

This is the result. If you see in GIF, I've print a PDF and this is a sample.

Some final notes for this great addon:

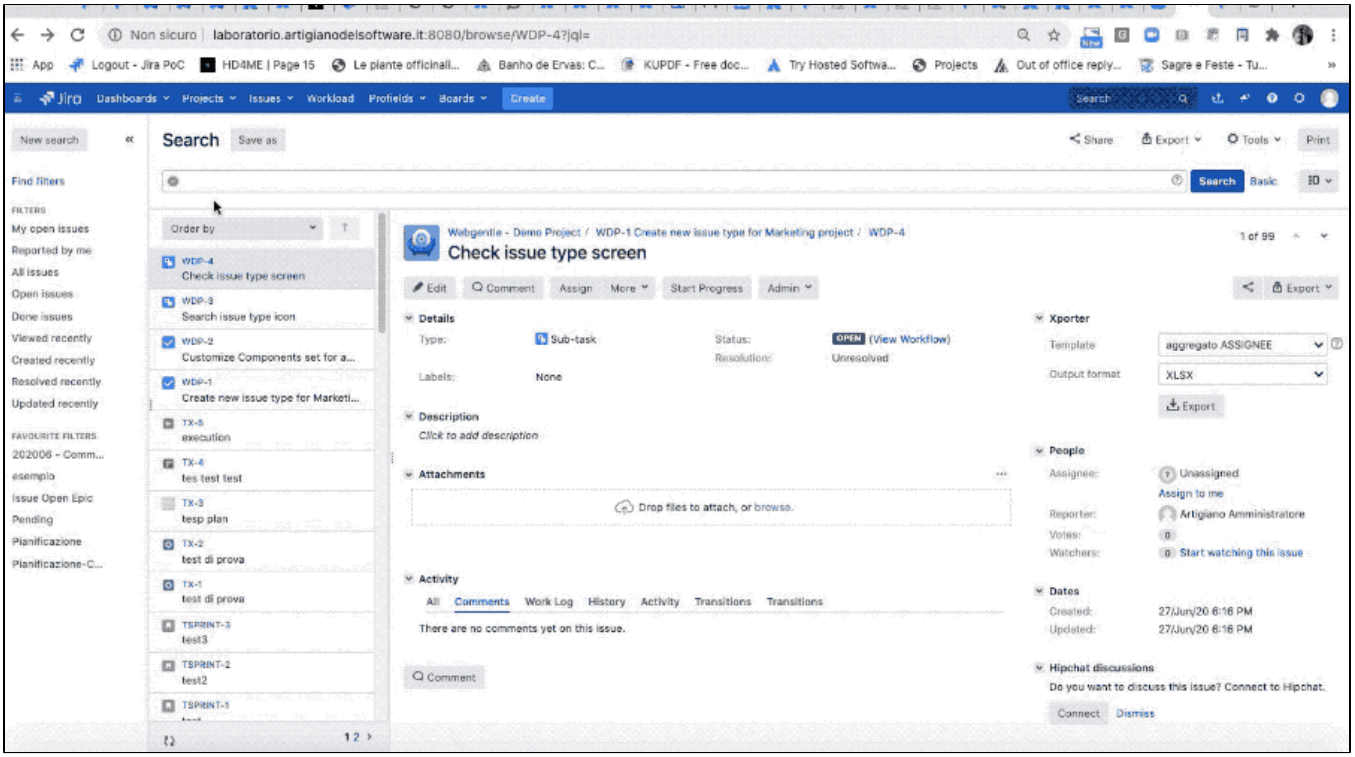

QR-CODE

As we see, a QR-Code is present in issue card and we can use it to reference the issue. If we use a QR-code reader we redirect to the URL of Issue. This is an important result. The result is shown in following image, where I use my mobile QR reader and I use the previous image.

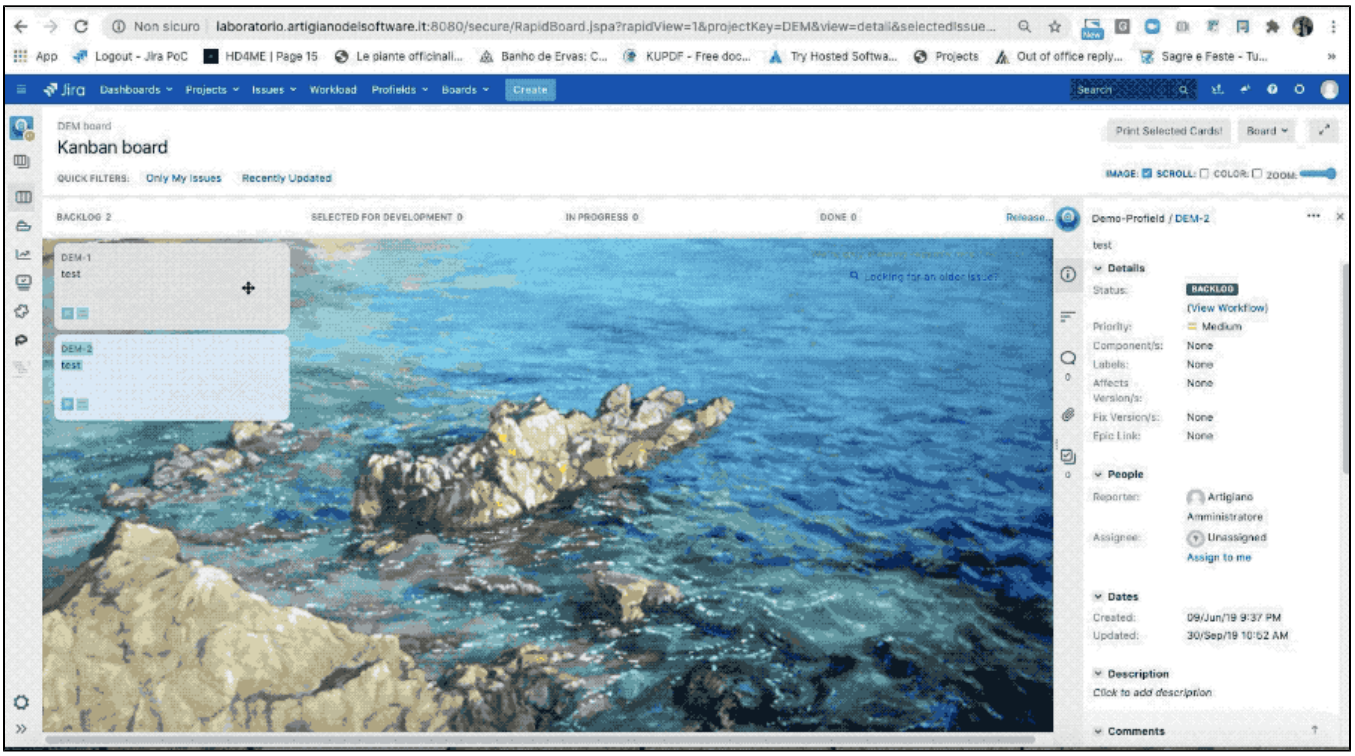

You can show in the card layout until 3 Custom Fields, and possibility to change the title Header of the cards

We can add up to 3 custom fields on layout. Let me explain how do this: once we select own issues, click PRINT button and select CF1/2/3 button as show in following GIF and set the **customfield_id** *(ask to your Jira Admin if you don't know the ID of the field to show)*

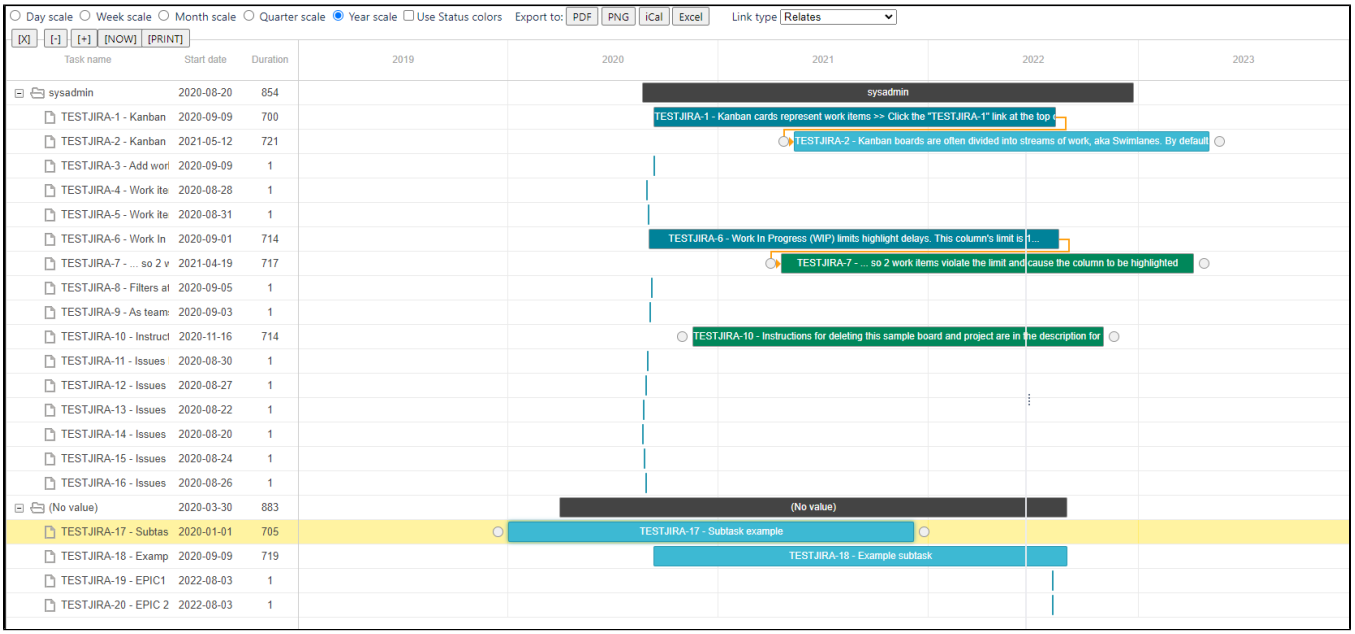

Integration with Kanban/Scrum Board and Backlog view

It's possible use Issue Card directly from Kanban Board. Just press ***Ctrl or Shift to multiple select*** and print.

Integration with Kanban Gantt: export the Gantt view!

Addon is compatible with **Kanban Gantt!,** as shown in this GIF, if **QR Issue Card Printer** plugin is installed, you will see an extra button to **E XPORT the Gantt to PDF/PNG/ICAL or EXCEL formats!**

Release Notes

2022-08-03 New release with Components bug fixed, performance improvements and print script autocontent, Card layout modified a little bit to show bigger QR code. Compatible with Jira 9
