Improve your Kanban boards in a very simple way, combining columns and WIPS, adding color and wallpaper to your board

➤ Description

Now with the **Kanban Combined WIP** App for Jira Cloud you can improve your Kanban boards in a very simple way, combining columns and WIPS, adding color and wallpaper to your board, in addition to WIPS by swimlane. It will allow you to zoom, scroll so you can see the board well on small laptop screens. **Try it for free!**

See this video to know more:

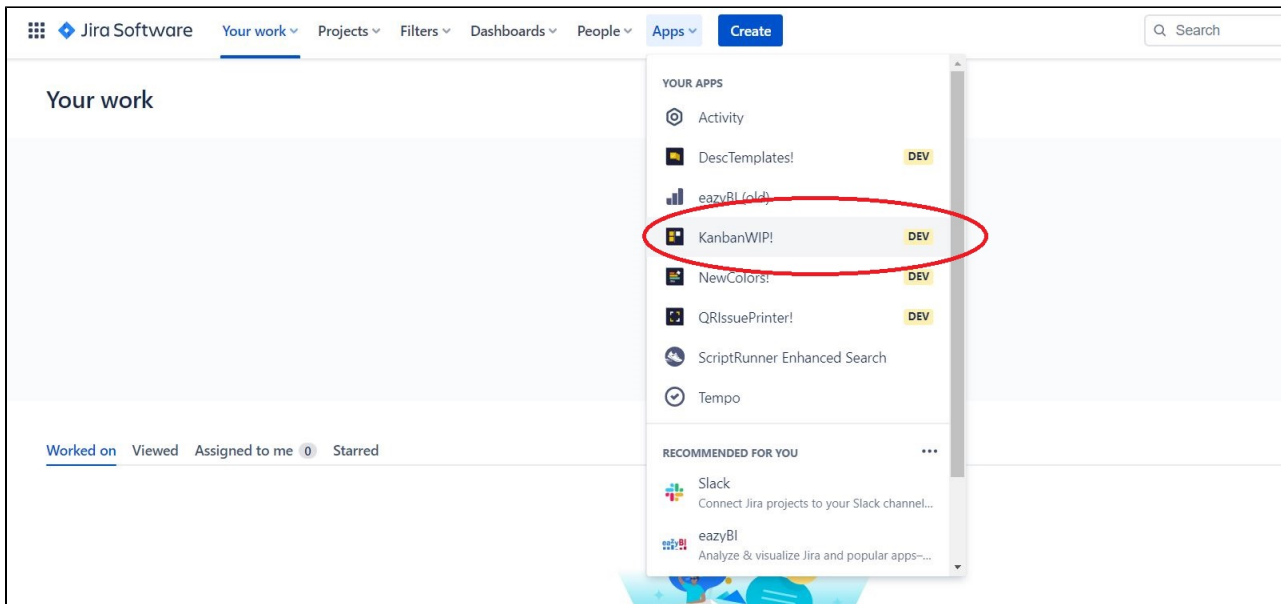

➤ Install instructions (*Jira Admin*)

Just connect to your instance and select the App from the Atlassian marketplace. **No global configuration is needed, that's all!**

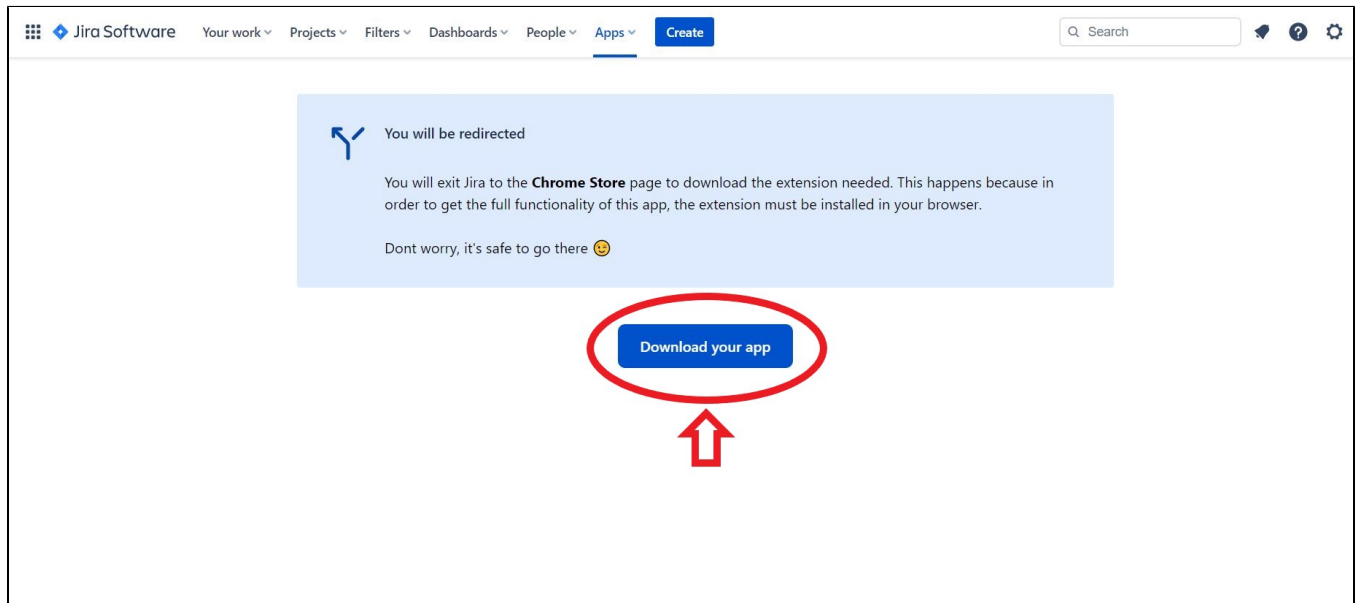

The screenshot shows the Jira Marketplace interface. At the top, it says 'Jira / Marketplace apps' and 'Feedback'. The main heading is 'Discover apps and integrations for Jira'. Below this is a search bar containing 'kanban combined', followed by 'Sort', a checkbox for 'Free for all teams', 'More Filters', and 'Categories'. It indicates '2 results'. Two app cards are displayed: 'Kanban Combined WIP for Jira Cloud' (Project management, 4 stars, 206 installs) and 'Rixxo Combined Scrum Kanban Workflow' (Use Kanban boards and Scrum boards with one workflow, Shared workflows, Workflow, 1.3k downloads).

➤ Install instructions (*Jira Users*)

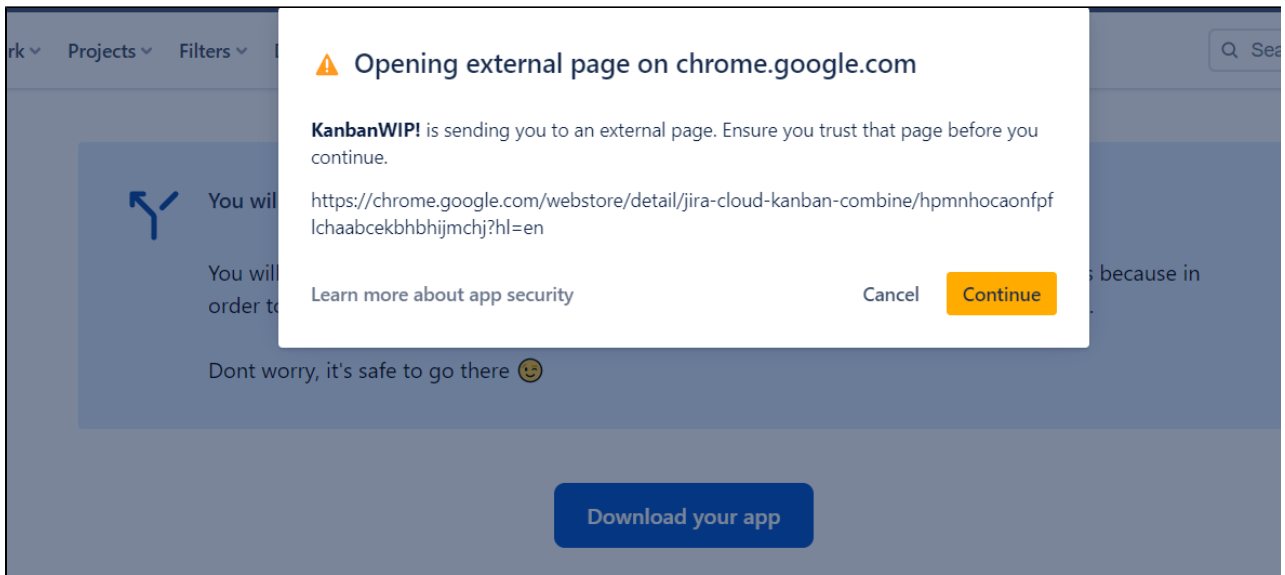

Go to the Apps section in the top menu and select KanbanWIP!

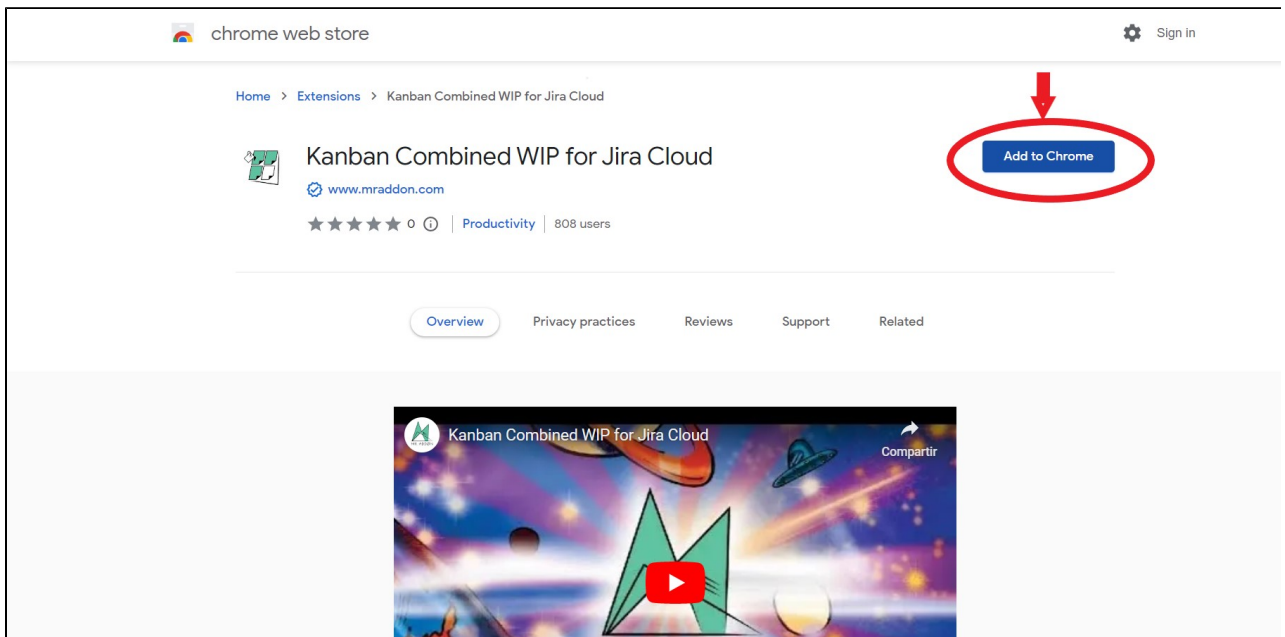

A page will open where you must click the **"Download your app"** button

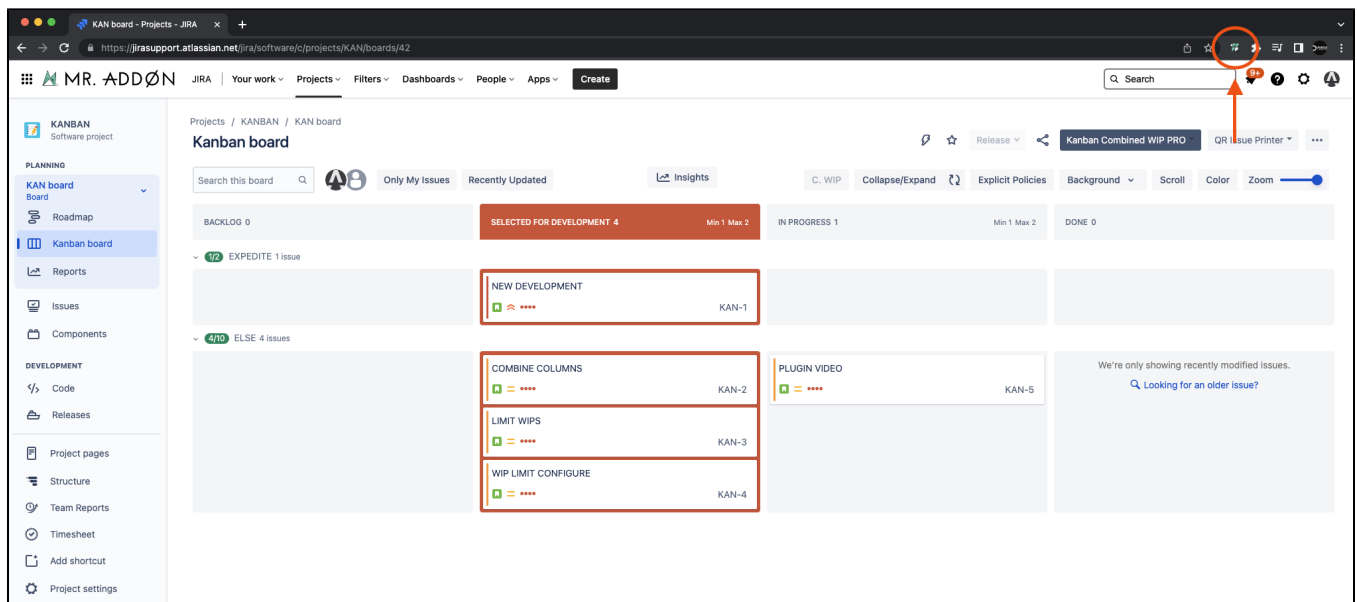

A new window will appear to warn that it is an external link. **Click on continue**

Directs you to the browser's web store. **Add the plugin to the browser**

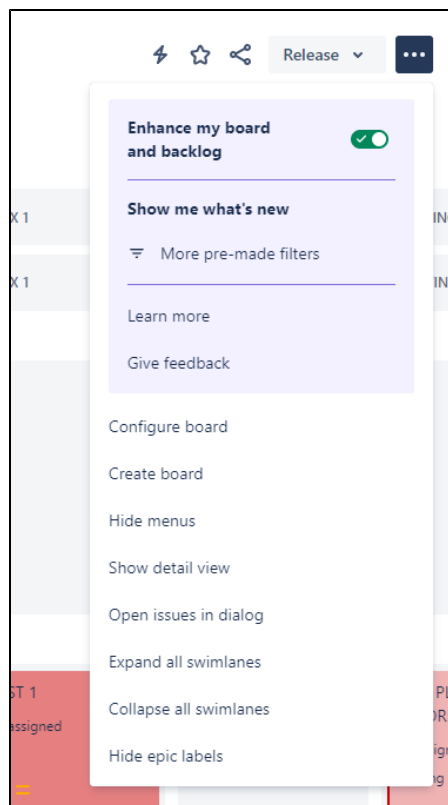

A plugin will be installed in your favorite browser: *Firefox, Safari, Google Chrome and Micorsoft Edge are supported.*

➤ Configuration Kanban Enhanced Boards (Jira Users) since October-2023

Since October 2023 exist a new type of Kanban boards in Jira Cloud, named **"Enhanced boards"**. You can enable/disable this type of board from "... " and **"Enhance my board and backlog"**

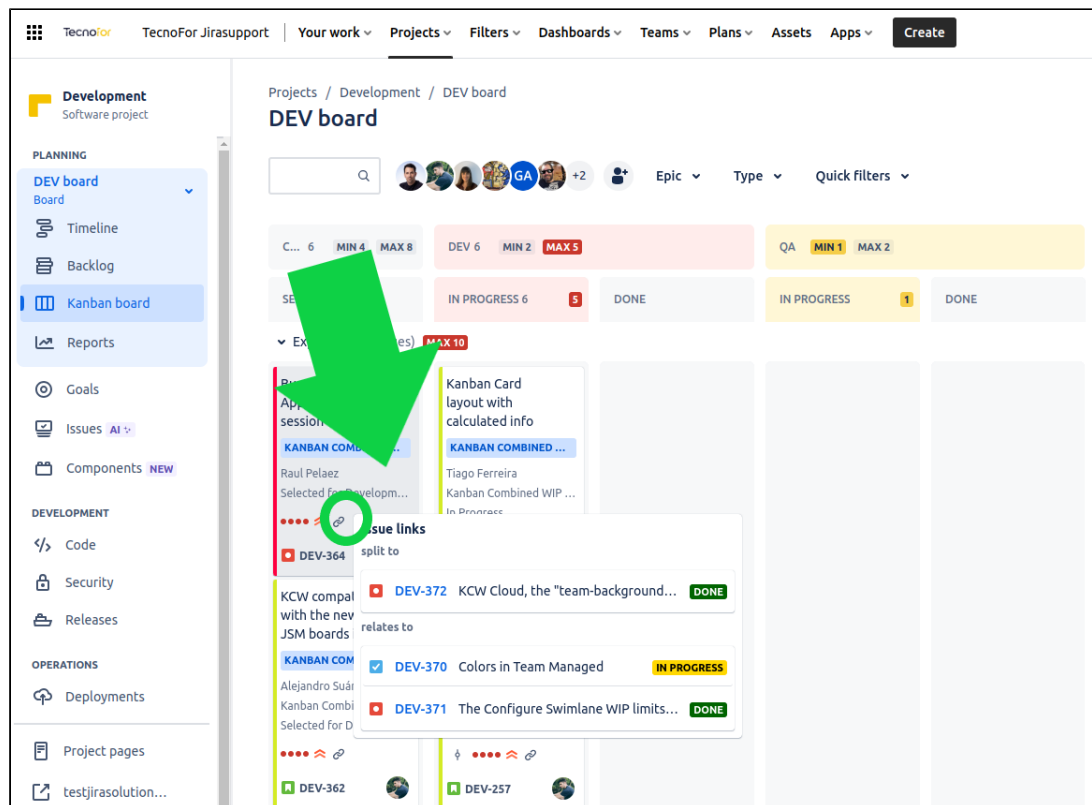

Now is time to configure the grouping header-columns, go to your usual Kanban board and select “...” “**Board Settings**”, go to the “**Columns**” section

Display blockers and dependencies (links) in cards

We've introduced a feature that lets you stay informed about all your blockers or dependencies without unnecessary delays. Just put the mouse pointer in the "clip" icon in the cards to show a popup with the linked issues and their statuses.

Define "Committed" status, track days since commitment, color-coded due date statuses, dynamic lead time display, instant insight on hover, and intelligent dependency visibility

We're thrilled to announce an upcoming update to the Kanban Combined WIP for Jira Cloud and Jira Datacenter, packed with powerful new features that will revolutionize your project management experience. This update, slated to hit the Chrome store in just a few days, brings a host of enhancements aimed at improving visibility, tracking, and overall efficiency within your boards.

Here's what you can look forward to:

1. Define "Committed" Status:

- Customize your board settings by defining a dedicated "**Committed**" status. This allows you to clearly mark tasks that are officially committed to be worked on.

[blocked URL](#)

2. Enhanced Card Insights:

- Keep track of time elapsed since commitment with the new “Days since Committed” feature directly on your cards.
- Color-coded backgrounds provide instant visual cues:
 - Green indicates a future due date.
 - Orange warns when a due date is approaching within one week.
 - Red signals that a due date has been exceeded.

3. Lead Time Calculation:

- Once a ticket is resolved, the card dynamically switches to display “Lead Time” instead of “Days since Committed”.
- Lead Time is calculated as resolved date minus committed date.
- Background colors signify:
 - Green if the due date is equal to or later than the resolved date.
 - Red if the due date is earlier than the resolved date.

4. Instant Insight on Hover:

- Hover over the “Days since Committed” or “Lead Time” values to reveal the exact dates in a convenient popup.
- For instances where calculation isn’t initially available due to performance reasons, a question mark symbol “?” prompts you to hover for an instant calculation.

5. Dependency Visibility:

- The “has dependencies” icon is now intelligently displayed only for cards with linked issues, streamlining your view and focusing attention where it’s needed most.

[blocked URL](#)

These updates are designed to empower you with greater control, clarity, and efficiency as you manage your projects on Jira. Stay tuned as we roll out these enhancements, and keep an eye on the Chrome store for the latest version. We can’t wait to see how these features elevate your Kanban experience!

Combine columns and WIPs

We can combine columns or we can group some columns using the split text “::” in the name of the columns

As example, we can group the “Selected for Development” column with “In Progress” column using the prefix “DEV::” in the name of both columns.

The screenshot shows the Jira Kanban board configuration page for a project named "KANBAN". The page is divided into several sections:

- Left Sidebar:** Contains navigation links for "KANBAN", "PLANNING", "DEVELOPMENT", and "Project pages".
- Top Navigation:** Includes "JIRA", "Your work", "Projects", "Filters", "Dashboards", "People", "Apps", and a "Create" button.
- Column Management Section:** Contains settings for "General", "Columns", "Swimlanes", "Quick Filters", "Card colors", "Card layout", "Working days", "Issue Detail View", and "Roadmap".
- Column Constraint:** A dropdown menu set to "Issue Count".
- Simplified Workflow:** A section titled "Using Simplified Workflow" with a note about the workflow for project "KANBAN".
- Visual Representation:** A visual representation of the Kanban board layout with columns: "Backlog", "DEV::Selected for Development", "DEV::In Progress", and "Done". Each column has a "No Min" and "No Max" constraint. The "Backlog" column shows 3 issues. The "DEV::Selected for Development" column shows "No issues". The "DEV::In Progress" column shows "No issues". The "Done" column shows "No issues".

We can combine also the **Min and Max WIP limits** of both columns

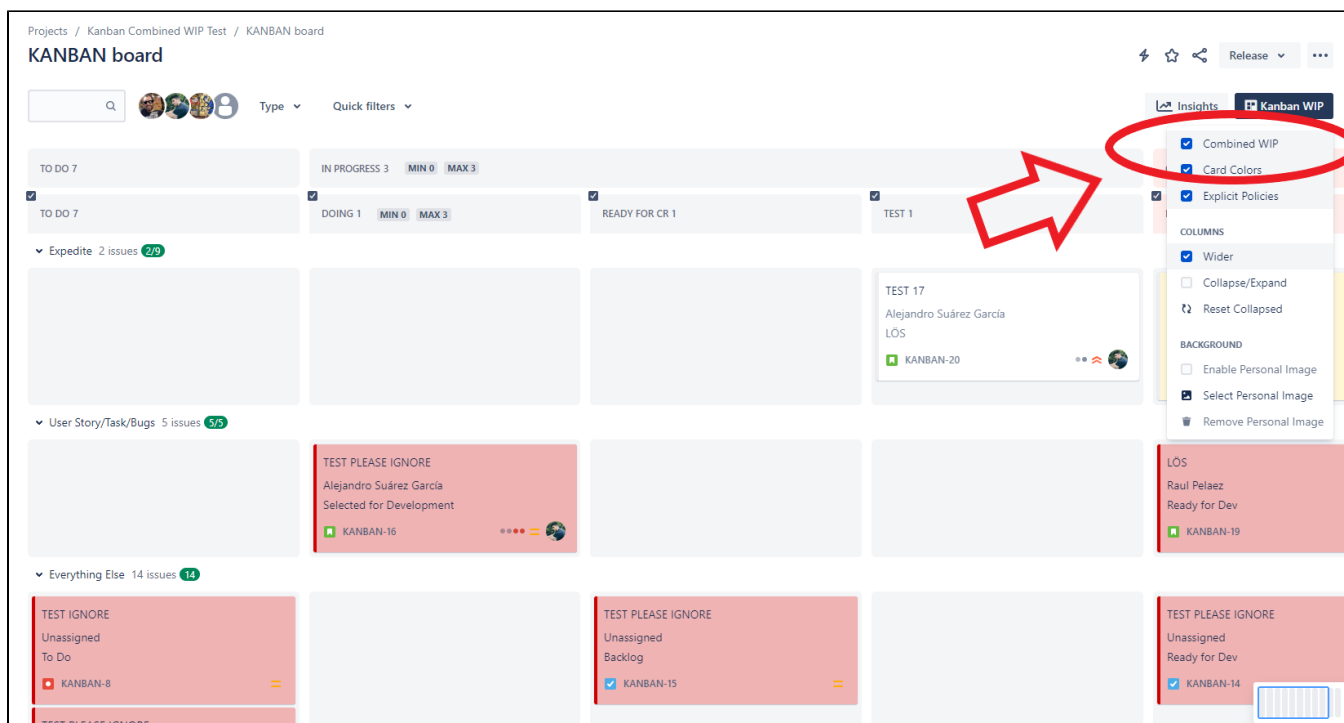

The screenshot shows the Jira Kanban board settings for a project named 'KAN board'. The left sidebar contains navigation links for 'PLANNING' (KAN board, Roadmap, Kanban board, Reports), 'DEVELOPMENT' (Code, Releases), and 'Project pages' (Project pages, Team Reports, Add shortcut). The main content area is titled 'Column management' and includes a 'Column Constraint' dropdown set to 'Issue Count'. Below this, there's a section for 'Simplified Workflow' with a 'Using Simplified Workflow' toggle. The bottom part of the screen displays a visual representation of the Kanban board with four columns: 'Backlog', 'DEV::Sele...', 'DEV::In Pr...', and 'Done'. Each column has a 'No Min' and 'No Max' label, and a 'Set resolution' checkbox. The 'Backlog' column shows '3 issues' and a 'Board getting full?' warning. The 'DEV::Sele...' column shows 'No issues' and a 'SELECTED FOR D...' label. The 'DEV::In Pr...' column shows 'No issues' and an 'IN PROGRESS' label. The 'Done' column shows 'No issues' and a 'DONE' label. A 'Unmappe...' button is visible on the right side of the board.

Combined WIP/Column WIP

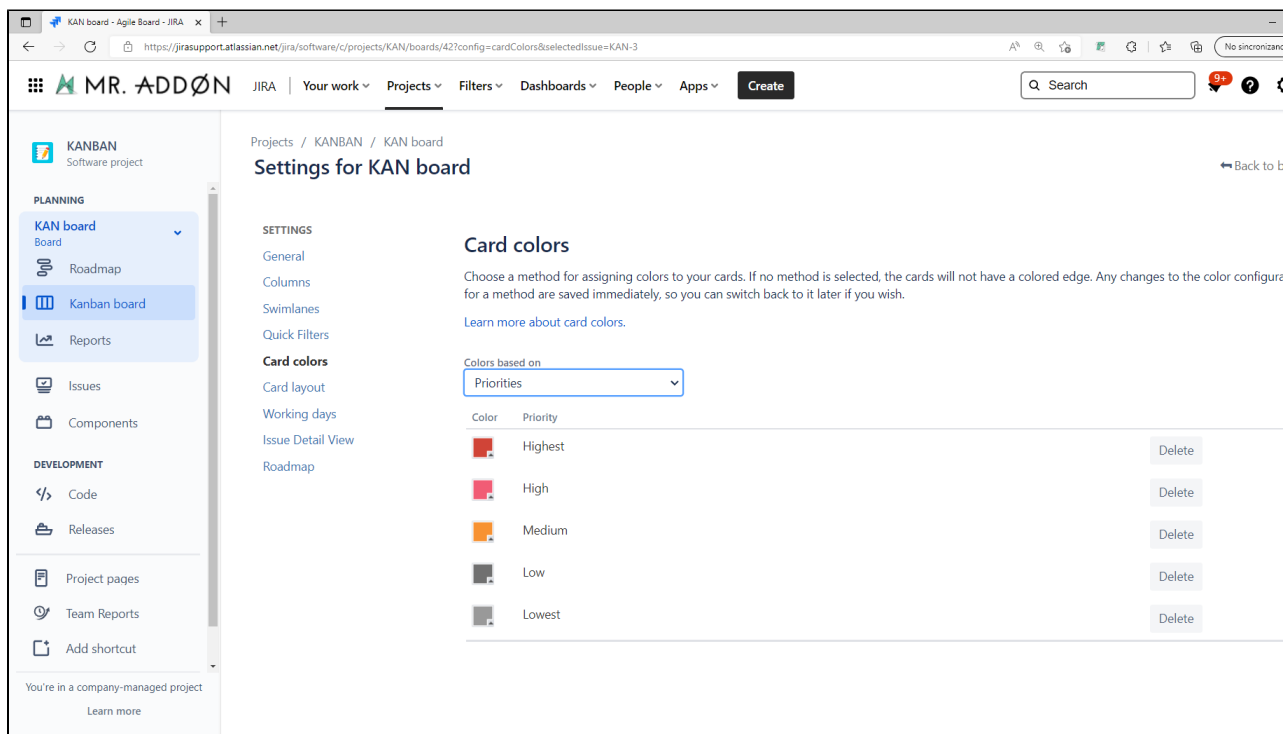

Now is possible to see the board with WIP combined in the merged columns, or just the WIP independent by column. Just click on the **"Kanban WIP"** button in the toolbar and after check/uncheck **"Combined WIP"** option

MERGED COLUMNS WIP or WIP BY COLUMN

Full-color Cards

Go again to "... "Board Settings" and now we go to the section "Card Colors". Just configure it as usual.

Now, let's see the board again and just click in "Card Colors" button in the "Kanban WIP" button in the toolbar

Team-Board Image (background picture)

Click in the board “...” “**Board Settings**” and go to the options of “**Kanban WIP Configuration**” in the “General” section. Select a background or a URL and the image selected will be applied to **all users of the board**

The screenshot shows the JIRA interface for the 'Kanban Combined WIP Test' project. The left sidebar contains navigation links for 'PLANNING' (KANBAN board, Roadmap, Backlog, Kanban board, Reports), 'DEVELOPMENT' (Code, Releases), and 'Project pages' (Project pages, Structure, Team Reports, Timesheet, Add shortcut, Project settings). The main content area is titled 'Settings for KANBAN board' and includes a 'General and filter' section. The 'General' subsection is active, showing board details like name, administrators, and location. Below this, the 'Kanban WIP Configuration' section is highlighted with a red circle and a red arrow. It contains a 'Background Image' field with a blue information icon, a checked checkbox for 'Enable board background image', and a link to 'Select background image'. A preview image of a landscape with a house is shown below the link. The 'Filter' section at the bottom shows a 'Saved Filter' for the 'KANBAN board'.

Filter for KANBAN board

Explicit Policies by column

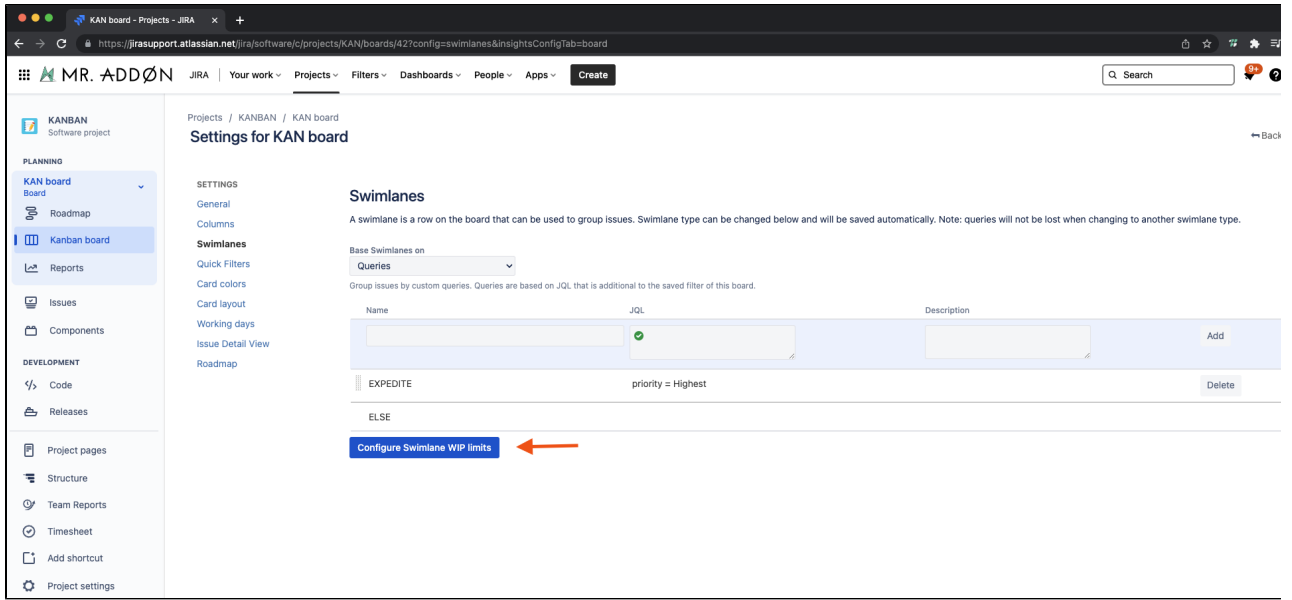

In the board, click in "**Kanban WIP**" button and then in "**Explicit Policies**". You can store information about the restrictions of the column and share the information with the users of the board. The information can be in rich text and is compliant with Atlassian standards (that means you can use tables, icons, etc)

The screenshot shows a Kanban board titled "KANBAN board" under the path "Projects / Kanban Combined WIP Test / KANBAN board". The board has several columns: "TO DO 7", "IN PROGRESS 3" (with MIN 0 and MAX 3), "CR 3" (with MIN 2 and MAX 2), "V... 3" (with MIN 1 and MAX 1), and "XXX 1". Each column has a "WIP" button and an "Explicit Policies" button. A red arrow points to the "Explicit Policies" button in the "V... 3" column. Below the columns, there are three sections: "Expedite 2 issues (2/9)", "User Story/Task/Bugs 5 issues (5/5)", and "Everything Else 14 issues (14)". Each section contains cards with details like "TEST 17", "TEST PLEASE IGNORE", "LOS", "test", and "TEST 1".

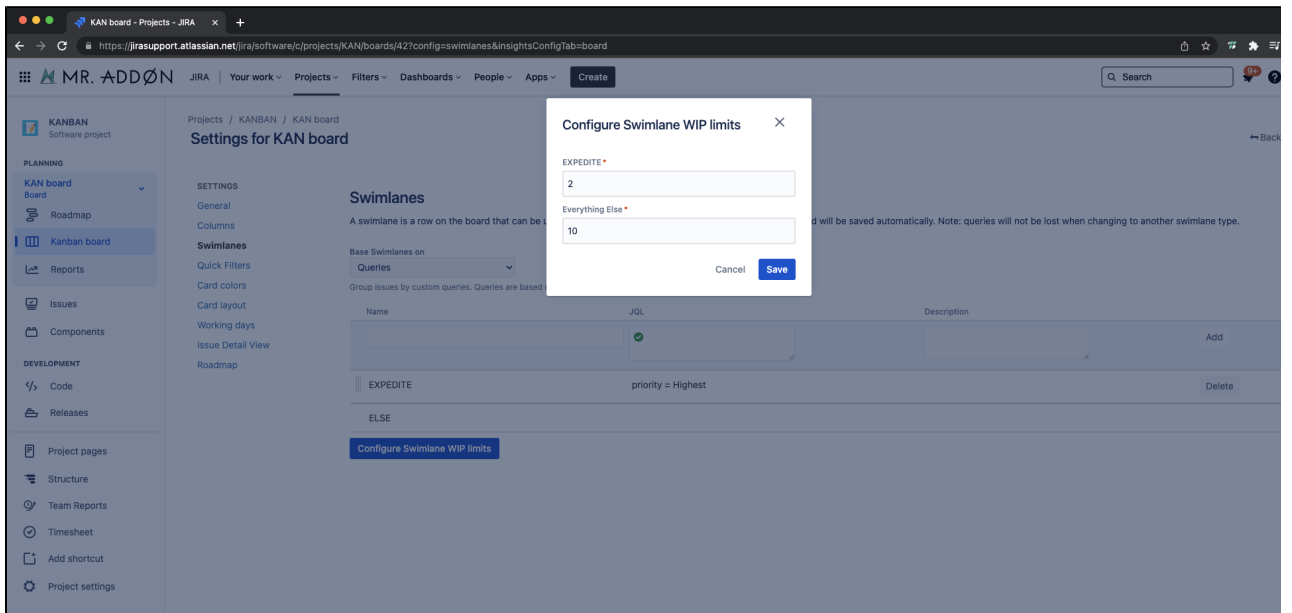

This screenshot shows the same Kanban board, but with the "Explicit Policies" editor open for the "IN PROGRESS 3" column. The editor is a rich text editor with a table, code, status, info panel, date, colored text, bold italic, and a Google link test. A red circle highlights the editor, and a red arrow points to the "Explicit Policies" button in the "IN PROGRESS 3" column. The board columns and sections are the same as in the previous screenshot.

Add WIPs to swimlanes

Go again to "... "Board Settings" and now we go to the section "**Swimlanes**". Just configure it as usual.

Then press "Configure Swimlane WIP limits" button

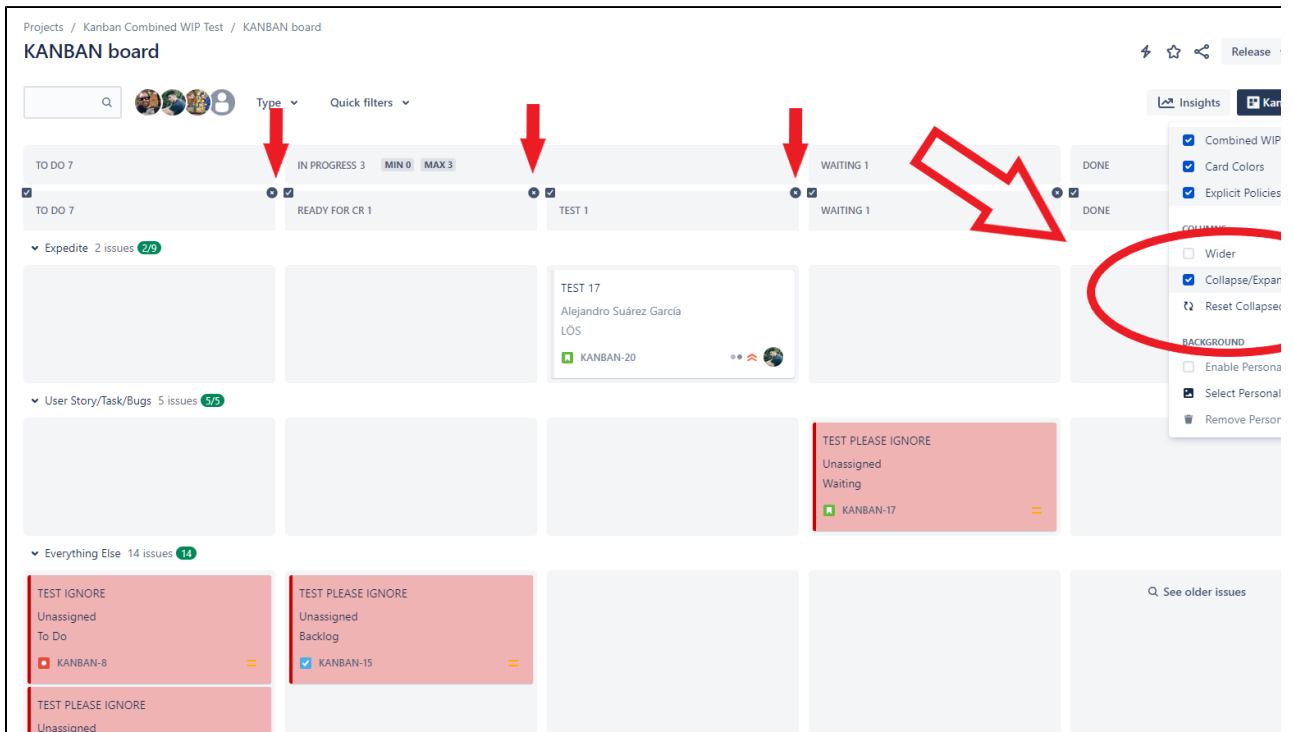

Add the limits for each swimlane and see the results!

Collapse/Expand columns new mode

Now we can **COLLAPSE/EXPAND** in the toolbar button "**Kanban WIP**" in order to remove non-used columns!

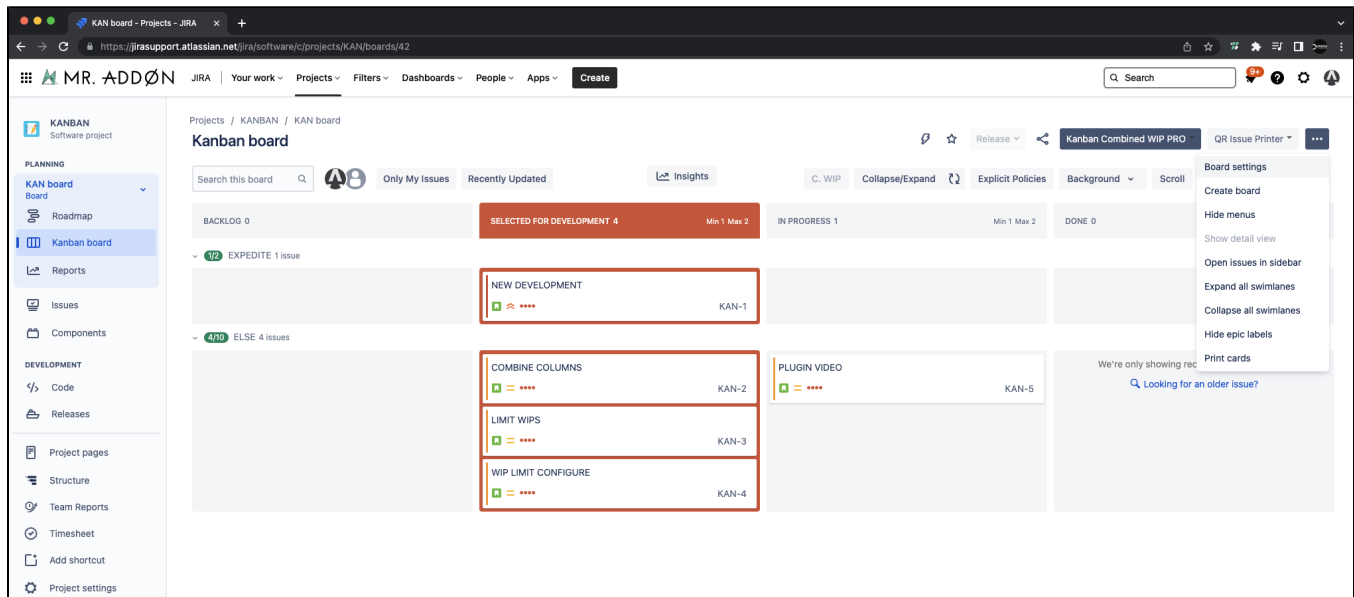

Click in "x" button to remove non-used columns (don't worry, because if you click again in "Reset Collapsed" the columns will appear again!)

That's all! Ready for production!

➤ Configuration Kanban Classic Boards (*Jira Users*)

Go to your usual Kanban board and select “...” “**Board Settings**”, go to the “**Columns**” section

➤ Combine columns and WIPs

We can combine columns or we can group some columns using the split text “::” in the name of the columns

As example, we can group the “*Selected for Development*” column with “*In Progress*” column using the prefix “**DEV::**” in the name of both columns.

Column management

Columns can be added, removed, reordered and renamed. Columns are based upon global statuses and can be moved between columns. Minimum and maximum constraints can be set for each mapped column.

Column Constraint: Issue Count

Constraints can be added to columns on the board for one statistic.

Simplified Workflow

Using Simplified Workflow

The workflow for project KANBAN is currently managed by Jira Software. Project Administrators can add and remove statuses below.

Buttons: Add status, Add column, Scroll Columns

Board layout columns: Backlog, DEV::Sele..., DEV::In Progress, Done, Unmappe...

Each column has 'No Min' and 'No Max' constraints.

We can combine also the **Min and Max WIP limits** of both columns

Add WIPs to swimlanes

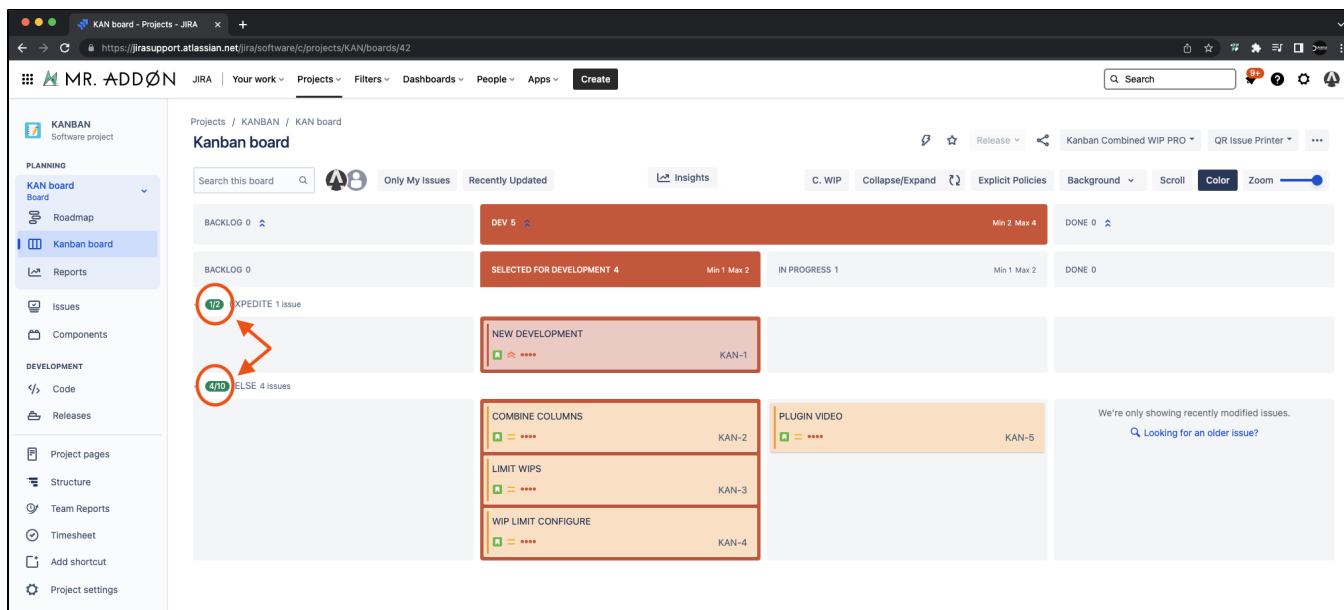

Go again to "... "Board Settings" and now we go to the section "Swimlanes". Just configure it as usual.

Then press "Configure Swimlane WIP limits" button

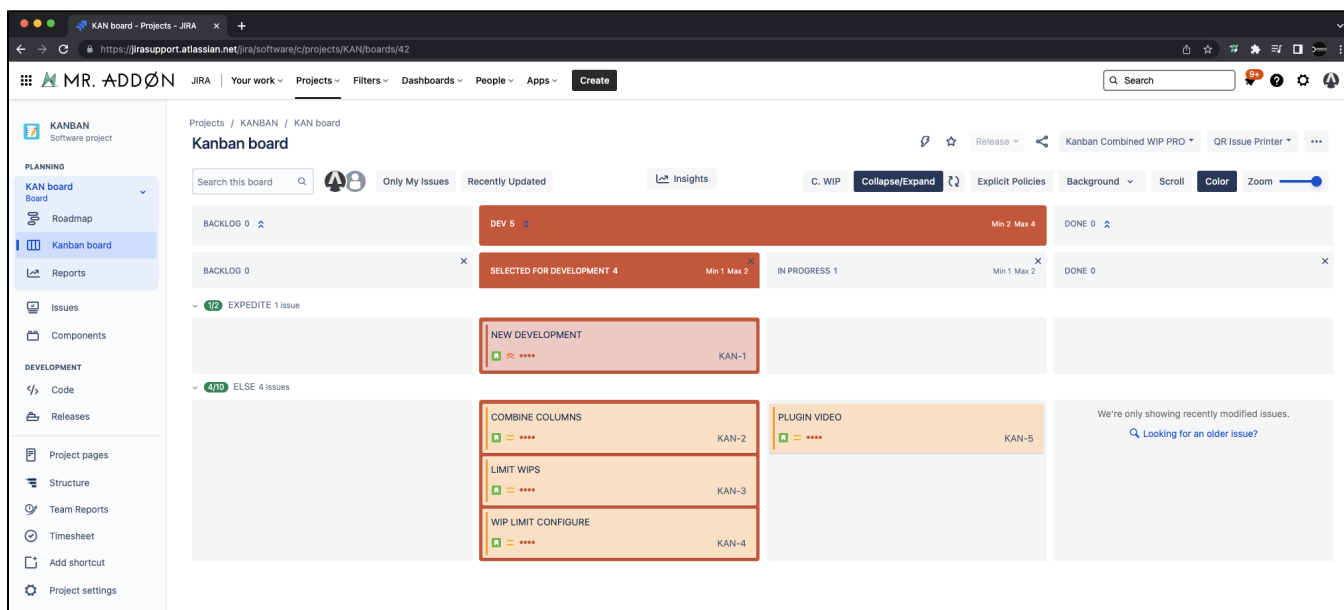

Add the limits for each swimlane and see the results!

➤ Collapse/Expand columns new mode

Now we can **COLLAPSE/EXPAND** in the toolbar in order to remove non-used columns!

Click in "x" button to remove non-used columns (*don't worry, because if you click again in the columns will appear again!*)

That's all! Ready for production!

Release Notes

- 31-05-2022 - WIP in swimlanes added
- 22-06-2022 - IMPORTANT news in Kanban Combined WIP for Jira Cloud and the new horizontal scrolling of boards in Jira Cloud

- 21-07-2022 - New version of Kanban Combined WIP (NextGen) Chrome plugin with COLLAPSE/EXPAND columns new feature
 - 27-07-2022 - New version of Kanban Combined WIP (NextGen) Chrome plugin with COLLAPSE/EXPAND columns mode improved in order to be able to preview the cards, and transition from the view and maintain the COLLAPSE mode.
 - 02-08-2022 - New version 8.2 of Kanban Combined WIP released with Collapse/Expand columns new features (*is the same version of Kanban Combined WIP (NextGen)*)
 - 27-10-2022 - New version 8.3 with combined header stability issues fixed
 - 02-01-2023 - New version 8.5 with Explicit Policies configurable by columns and shared with the users of the board. New Team-background image to share the same picture to the users of the board.
 - 08-02-2023 - Now is compatible with Safari browsers
 - 18-10-2023 - Now is compatible with the new Enhanced Kanban board mode
 - 20-02-2024 - A clip icon is always displayed in the cards to show the linked dependencies and their status
 - 18-03-2024 - Introducing new features for Kanban Combined WIP in Jira Cloud and Datacenter: define "Committed" status, track days since commitment, color-coded due date statuses, dynamic lead time display, instant insight on hover, and intelligent dependency visibility.
-
