Cloud

Paid

This plugin provides the ability
to add a color to the statuses of
Jira Cloud issues at a glance

➤ Description

With this Jira Cloud add-on, your Jira users will live in a full-color world! ... more beautiful than the usual and bored "blue", "yellow", "green" in the statuses of the issues. The colorization is done in the Issue Advanced Search View screen, in the Jira Dashboard gadgets and the Jira Service Management queues and Customer Portal, Roadmaps and Plans. With this plugin your Jira will look like a pretty amazing software!. The list of colors that this plugin allows are the entire HTML common color name values. **Take a Look inside the entire list of color names**

More info in this video:

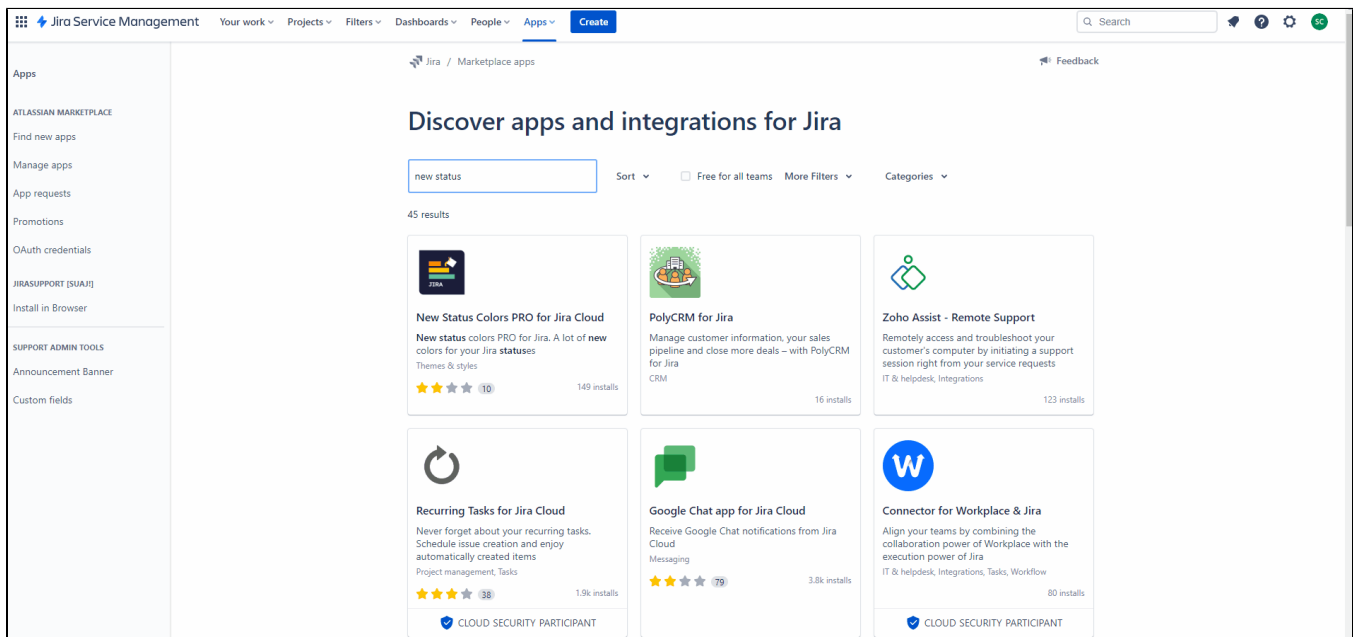

Very Important:

A plugin must be installed in your favorite browser: **Chrome, Safari, Firefox and Microsoft Edge are compatibles.**

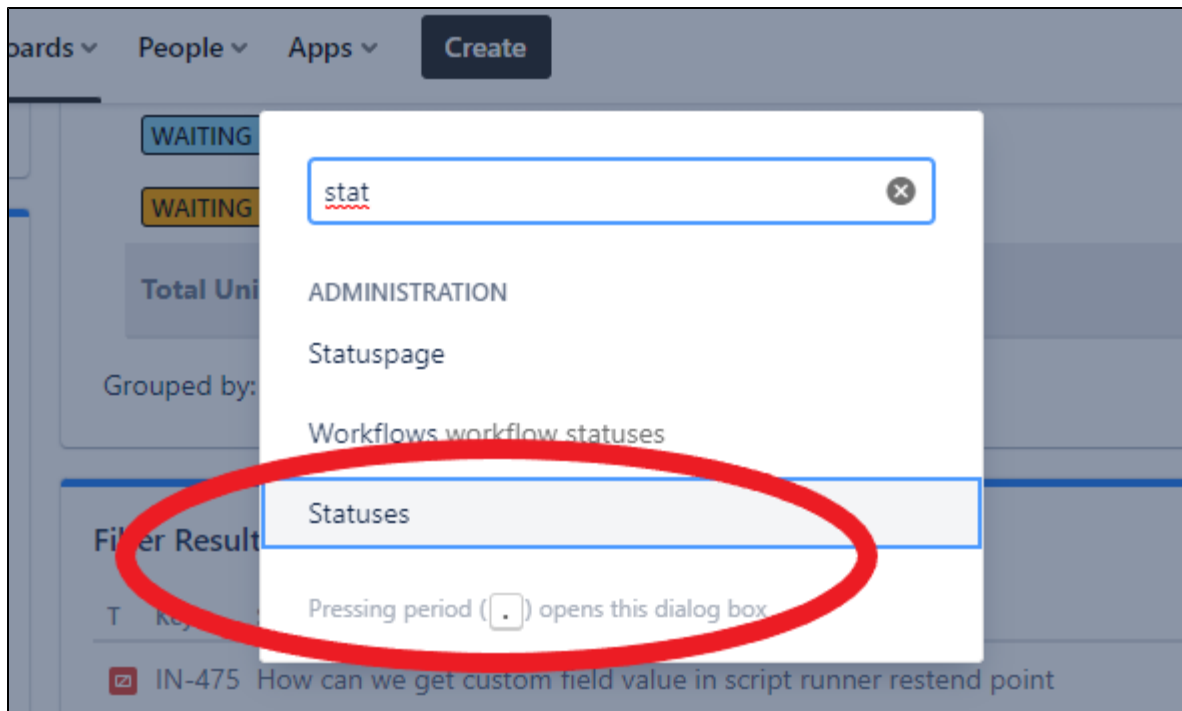

➤ First: install the addon (by a Jira Cloud Admin)

Follow the classic way to install using the **Find new apps in the Atlassian Marketplace**, as shown below

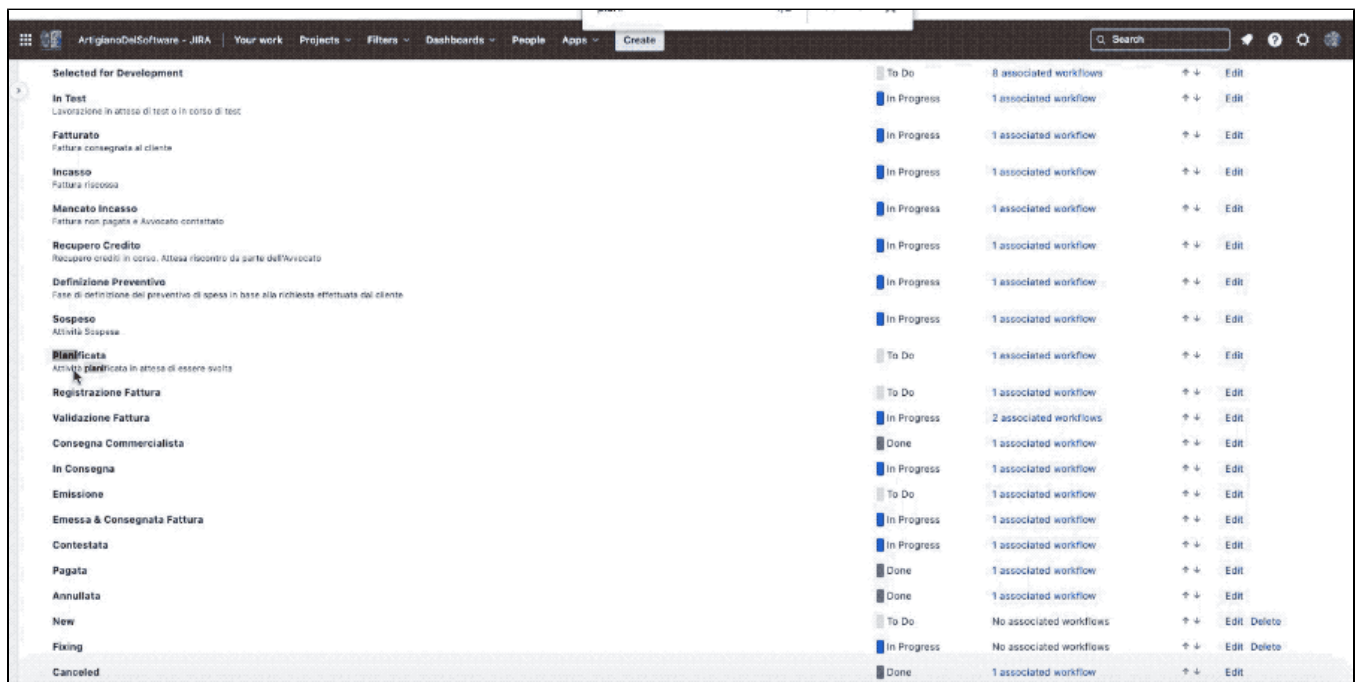

➤ Second: configure the colors in the status description (by a Jira Cloud Admin)

We can set new color for own states easily. Just go to the Global Admin section of Jira to edit the Jira Statuses.

Edit some Status and put the right color code (we can discover the right color code from this page, where there is a great explanation of all colors) inside the **Description** field as show on following GIF:

example: In the global "Status" standard config page of Jira, put in the status description "(black)" or "(springgreen)" or "(pink)"... always the name of the color in lowercase in parentheses

Development
This status is managed internally by JIRA Software

Edit status

Name*
Cancelled

Description
(red)

Explains the significance of a status when it is moved in to this status. Descriptions of a status will appear in tooltips.

Category*
To Do

Helps identify where an issue is in its lifecycle. Issues move from **To Do** to **In Progress** when work starts on them, and later move to **Done** when all work is complete.

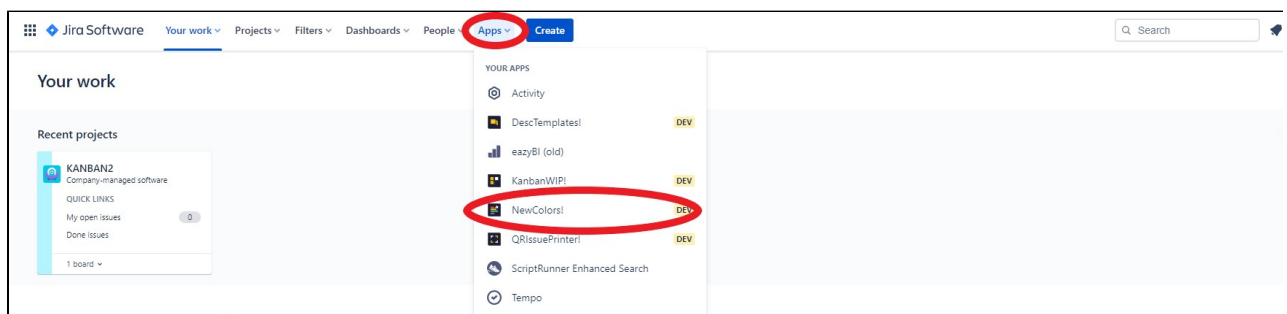

Icon URL*
/images/icons/statuses/generic.png [select image]
(relative to the Jira web application e.g /images/icons OR starting with http://)

Update Cancel

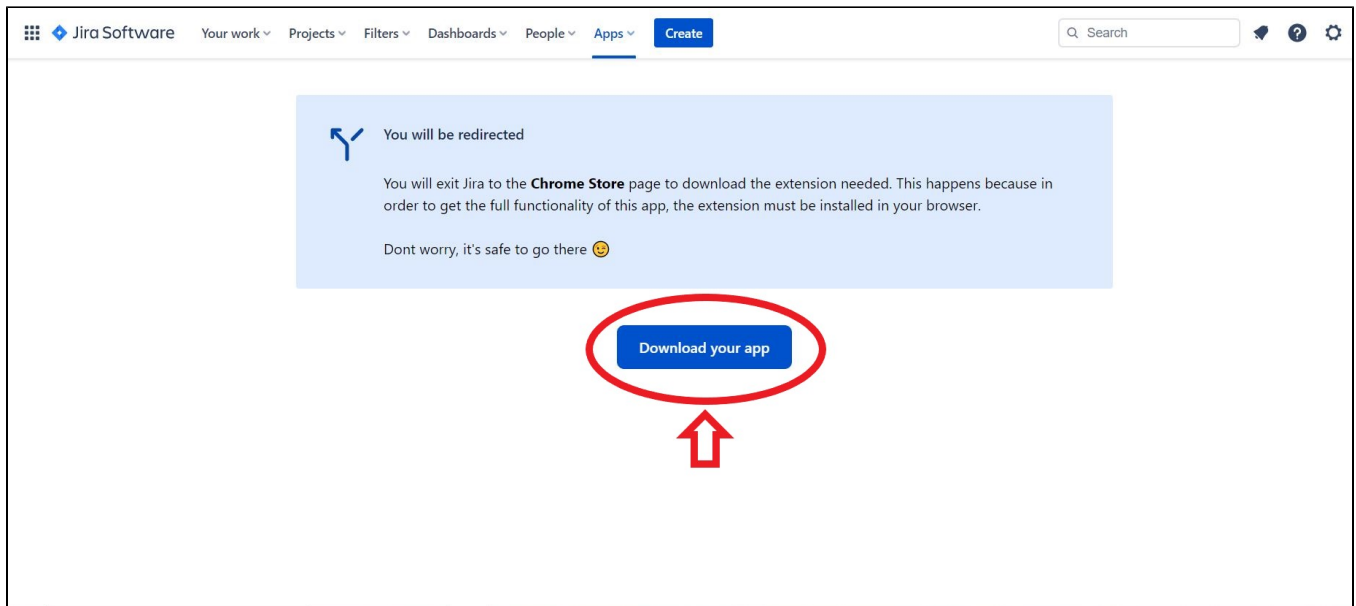

➤ Next steps: install the addon in your favorite browser (by Jira Users)

After this, the following pictures show us how deploy the **Chrome/Safari/Edge/Firefox** extension:

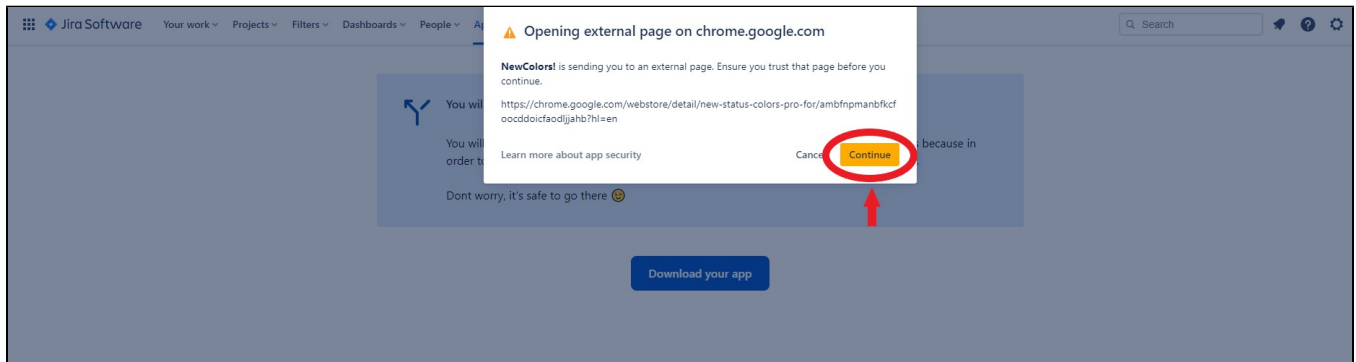

(In your Jira Cloud, go to “Apps” “NewColors!”)

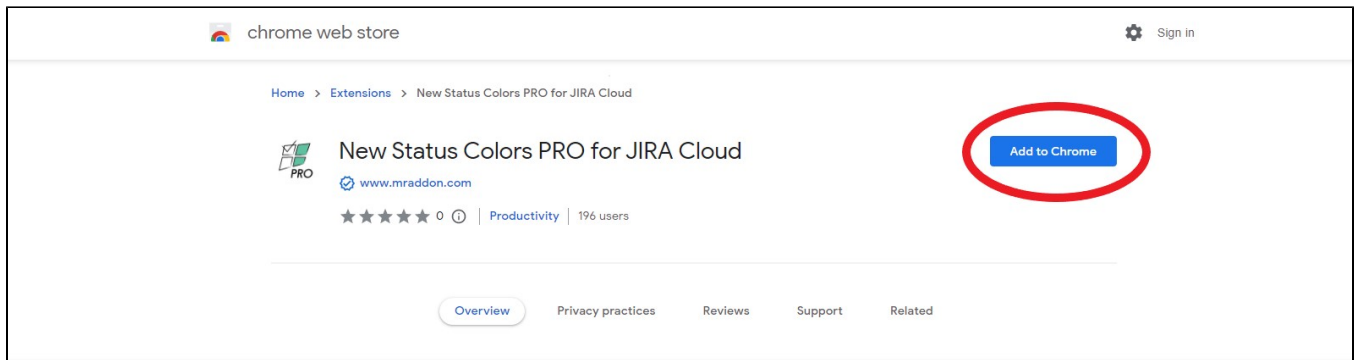

A page will open where you must click the “**Download your app**” button

A new window will appear to warn that it is an external link. **Click on continue**

Directs you to the browser's web store. **Add the plugin to the browser**

➤ Usage (by Jira Users)

Just select **Filters** **Advanced Issue Search** and result will be visible in:

Advanced Issue Search View screen

Note: In large queues use the mouse "scroll" to reload the status color

DEV-154	DEV-154	Kanban Gantt not visible in new JIRA 9	Raul Pelaez	Raul Pelaez	DONE	Done

The screenshot displays the Jira interface for a project named 'KANBAN TEAM MANAG...'. The top navigation bar includes links for 'Your work', 'Projects', 'Dashboards', 'Teams', 'Plans', 'Assets', 'Apps', and 'Create'. The left sidebar shows a navigation menu with sections for 'PLANNING' (Timeline, Backlog, Board, Reports, Goals, Issues), 'DEVELOPMENT' (Code, Security, Releases), 'OPERATIONS' (Deployments, On-call), 'Project pages', and 'APPS' (Description templates).

The main content area shows a Kanban board for the 'KANBAN TEAM MANAGED' project. The board is titled 'Issues' and has a filter set to 'project = "KN" ORDER BY created DESC'. The board displays a list of issues with columns for Type, Key, Summary, Reporter, Assignee, P (Priority), Resolution, Status, and Location. The issues are color-coded by status: 'TO DO' (blue), 'SELECTED FOR DEVELOPMENT' (dark blue), 'IN PROGRESS' (yellow), 'WAITING FOR CUSTOMER' (orange), and 'DONE' (green). A dropdown menu is visible next to the 'SELECTED FOR DEVELOPMENT' status, showing options for 'SELECTED FOR DEVELOPMENT', 'TO DO', 'IN PROGRESS', 'WAITING FOR CUSTOMER', and 'DONE'.

Below the Kanban board, there is a 'Task workflow' section. It shows a diagram of the workflow for this issue. The workflow starts with a 'Create' action, leading to a 'TO DO' status. From 'TO DO', the workflow can move to 'SELECTED FOR DEVELOPMENT', 'IN PROGRESS', 'WAITING FOR CUSTOMER', or 'DONE'. Each status has a corresponding 'ANY STATUS' label below it. The workflow ends with a 'Close' action. A search bar and a zoom slider are also present in the workflow diagram.

➤ Audit Transitions and Time in status IssueView Panels (by Jira Users & Admins)

- With these new superpowers you will be able to see all the information you need within the Issues: A **Transitions panel** to track and audit ticket transitions, another **panel with the most relevant Transitions** and a last panel with the **time spent grouped by status** (Time in status). In addition, you will see the statuses in full color if your browser extension is activated!

Audit Transitions Panel

Time in Status Panel

[blocked URL](#)

Use the **"Menu"** Icon (near the panel title) to change the panel view

[blocked URL](#)

Auditing a ticket will now be a simple task

➤ Troubleshooting (by Jira Users & Admins)

- If your admin change or modify or add new statuses and colors, probably the cookie will be outdated and must be refreshed. In that case, click **Ctrl+Shift+Reload** in your browser and the cache of status-colors will be refreshed.

Release Notes

- New version 4.3 compatible with Jira Service Management Queues and more things coming soon!
- 04-07-2022 New version with colors in status-buttons in all views of Jira Software and Service Management
