QR Issue Card Printer for Jira

by [MrAddon®](#) by [TecnoFor](#)

Server & Datacenter

Paid

This addon give the possibility
to print the issues as cards with
beautiful layouts

➤ Description

Print your **filters and issues** with a single click, with a configurable and beautiful layout.

Show a large **QR code** in each card to quickly locate your tickets.
Now you can also print from your **Kanban or Scrum board and from your backlog view!**
New features coming soon!

The code is based in the awesome Github repository of Bengt Brodersen from Qoomon.

Summary video (2 minutes):

➤ Install addon

Follow the classic way to install using the **Find new apps**, as shown below

The screenshot shows the 'Find new apps' interface in Jira Service Desk. On the left is a sidebar with navigation links: Workflow Actions, Get Help, JIRA MISC CUSTOM FIELDS, Getting started with JMC, JIRA MISC WORKFLOW EXTENSIONS, Getting started with JMW, JMW Configuration, Groovy Console, Shared Groovy Scripts, LASTLOG-ADD-ON, View log, Thread Dump, SUMUP, Calculation rules, User Permissions, Administrator configuration, THE SCHEDULER, Access Manager, Manage Scheduled Issues, Import Scheduled Issues, Export Scheduled Issues, Global Calendars, and Failed Executions History. The main content area displays two add-ons. The first is 'New Status Colors PRO for Jira' by www.MrAddon.com, with 179 installations and a 'Free trial' button. The second is 'Issue Card Printer for Jira' by www.MrAddon.com, with 67 installations and a 'Free trial' button. Below these, there are sections for 'New feature: Now you can set the Title Header', 'New feature: Print until 3 customfields', 'Simple, Quick, Beautiful.', and 'More details'. A video player is embedded on the right side of the 'More details' section.

As you see, procedure is very easy 😊

That's all! Now take a look in your **Issues, Filters and Kanban/SCRUM boards and backlogs** and you will see a new button **"Print QR"**

➤ General Configuration

No General Configuration is needed. Just use it 😊

➤ Usage

Addon put a new button **“Print QR”** in *Search for issues, filters , Kanban/Scrum boards, backlogs and Issue views.*

So just **select issues** with **“Ctrl”** or **“Shift”** key and click in **Print QR** button from a **Kanban/Scrum boards**.

Or just select issues with "Ctrl" or "Shift" key and click in **Print QR** button from a **Backlog** view of the board.

Or just **Search for Issues** or select a **saved Filter** and click in **Print QR** button!

Once finished click in **"Print"** to configure margins and send the cards to the printer!

Example:

Print only one Issue!

Yes, in the Jira usual Issue View you will see the extra button **"Print QR"**, just click it!

Ready to print!

Result

This is the result. If you see in GIF, I've print a PDF and this is a sample.

Some final notes for this great addon:

QR-CODE

As we see, a QR-Code is present in issue card and we can use it to reference the issue. If we use a QR-code reader we redirect to the URL of Issue. This is an important result. The result is shown in following image, where I use my mobile QR reader and I use the previous image.

You can show in the card layout until 3 Custom Fields, and possibility to change the title Header of the cards

We can add up to 3 custom fields on layout. Let me explain how do this: once we select own issues, click PRINT button and select CF1/2/3 button as show in following GIF and set the **customfield_id** (ask to your Jira Admin if you don't know the ID of the field to show)

Integration with Kanban/Scrum Board and Backlog view

It's possible use Issue Card directly from Kanban Board. Just press **Ctrl or Shift to multiple select** and print.

Integration with Kanban Gantt: export the Gantt view!

Addon is compatible with **Kanban Gantt!**, as shown in this GIF, if **QR Issue Card Printer** plugin is installed, you will see an extra button to **E XPORT** the Gantt to PDF/PNG/ICAL or EXCEL formats!

Release Notes

2022-08-03 New release with Components bug fixed, performance improvements and print script autocontent, Card layout modified a little bit to show bigger QR code. Compatible with Jira 9
